Good idea, they may be open to giving the second dose. The issue of similar situations of people moving between provinces having had one dose was discussed by the various provincial Chief Medical Officers of Health, there wasn't consistency of approach and it will likely depend on how the patient fits in Ontario's phas3d approach. Jim

Thanks – we are also reaching out to local PH to see if they will take her in a clinic.

Hi Jeremy, my thoughts, [REDACTED]

[REDACTED] As you will know, other jurisdiction Quebec and UK are extending the interval between doses up to 12 weeks, Jim

Folks,

I assume we have no contingency for the situation described below but thought I would check in just in case.

Hi again,

Thoughts on how we move forward here? Has this happened to date?
Sue

Good Morning Sue,

I have just landed in Edmonton and just wanted to notify you of the following information regarding [REDACTED]

As it is not recommended to switch manufactures between doses in the series [REDACTED] should continue with the series of Pfizer vaccinations.

I'm not sure at this time if there is an interim plan in this regard as it was my understanding that in Ontario, patients are not transferred until they have received the complete series.

Thank you for your attention to this matter,

Brittany Flowers RN, B.Sc.N
