**Subject:** Updated chronology BN

Hello,

In terms of the Chronology BN [REDACTED] 24 (1) (b) I've asked Laura to continue updating the table weekly. It's been tremendously helpful to me when I've been looking back at when we did what in terms of measures, etc.

Just FYI and to share with those that would benefit from it.

Jenn

**COVID-19 Timeline – Alberta (as of June 1 at 12:30 p.m.)**

The table below shows the number of confirmed COVID-19 cases in Alberta since the first case was identified on March 5, 2020, the major actions taken and announcements made by the Government of Alberta related to the pandemic, and other significant events.

Date	Total Cases in Alberta <sup>1</sup>	Known Source <sup>2</sup>	Unknown Source <sup>3</sup>	Government of Alberta Public Health Measures & Announcements	Other Significant Events
N/R					

<sup>1</sup> The sum of the “known source” and “unknown source” cases may not equal the total cases because Alberta Health receives positive test results sooner than it receives the case report forms that indicate how the individual contracted the virus.

<sup>2</sup> “Known source” refers to cases related to travellers and close contacts.

<sup>3</sup> “Unknown source” refers to suspected community transmission cases.
