

ATIP Request A-2020-00493

Request:

"Number of inmates placed in medical isolation, by month and institution, from January 1st, 2020 to February 28th, 2021
 Average duration of time in medical isolation, by month and institution, from January 1st, 2020 to February 28th, 2021
 Number of inmates placed in "modified routine," by month and institution, from January 1st, 2020 to February 28th, 2021
 Average duration of time in "modified routine," by month and institution, from January 1st, 2020 to February 28th, 2021
 Number of inmates placed in SIU, by month and institution, from January 1st, 2020 to February 28th, 2021
 Average duration of time in SIU, by month and institution, from January 1st, 2020 to February 28th, 2021"

Response:

No records exist for the duration of time in medical isolation. In response to the COVID-19 pandemic, CSC had to implement a number of processes quickly and our primary focus was to direct our efforts to reduce the risk of transmission of COVID-19. The electronic mechanism for tracking medical isolation does not capture the start and end time of medical isolation. This information is recorded in free-text medical notes or scanned forms that would require manual retrieval. The machine-readable data pertaining to medical isolation (i.e. an Offender Management System alert) allows only for the identification of individuals who need to be monitored, and stores only an audit log of when the alert is entered and deactivated by staff.

There is no data recorded that can be used to report on total number and duration of modified routine.

Offenders that are currently in medical isolation at time of extraction are included in the results. The Medical Isolation alert is reported in the month that it started. Data from March 2020 may be incomplete, as the full implementation of the OMS alert used to extract this information was April 1, 2020.

Total offenders placed in Medical Isolation

SIU Data for ATIP Request A-2020-00493

Request:

- Number of inmates placed in SIU, by month and institution, from January 1st, 2020 to February 28th, 2021
- Average duration of time in SIU, by month and institution, from January 1st, 2020 to February 28th, 2021

Considerations:

- CSC does not separate Restricted Movement from Structured Intervention Units. All authorizations are included in this response.
- CSC only reported on number of authorizations per month. Example: if an inmate was authorized to go to an SIU on the 31st of March, and was released on April 2nd, this inmate would be calculated only for the month of March (when authorization was given).
- Response 2. Although the requestor is seeking the **average** duration, CSC reports primarily on the **median**, as it represents to middle value of a distribution. Both reports are included.
- The average disproportionally misrepresents the number of days, as one outlier could influence the overall average.
- For the duration of authorizations, the average runs close to 30 days during the time period while the median is close to 14 days

Response:

1. The following table represents the authorizations for transfer to an SIU started each month between January 1st, 2020 to February 28th, 2021. The table includes the total number of authorizations started each month (including RM). The Appendix A provides a breakdown per region and site, for every month.

Authorizations for Transfer to an SIU Started Each Month Between January 1st, 2020 to February 28th, 2021	
Month	Authorizations Started
Jan 2020	217
Feb 2020	194

Aug 2020	220
Sep 2020	193
Oct 2020	196
Nov 2020	150
Dec 2020	207
Jan 2021	180
Feb 2021	189

(Source: Data Warehouse as at 2020-2021 fiscal year-end)

Appendix A

The following table represents the authorizations for transfer to an SIU started each month between **January 1st, 2020 to February 28th, 2021**. The table includes the total number of authorizations started each month. The authorizations are listed by the initial facility of the authorization. Facilities with no data had no authorizations start in that facility. No data anomalies have been excluded.

2.

The table below includes the median duration of authorizations ended each month. The authorizations are listed by the region/institution where the authorization ended. There were no authorizations ended in November 2019 so that month is not included in this table.

CSC reports on the median duration rather than average in its reporting. The median duration presents a better indication of the duration.
