Hi Chris,

Sheryl is wondering if we require her assistance in circulating the PHAC vaccine training info? I think this was one that you had suggested, so let me know how you would like to proceed in terms of next steps and perhaps I can work with Sheryl.

Thank you!
Maddi

Hi Madison,

Do you still need assistance with the communication of the PHAC training or was something sent to the regions that this is available? I just wanted to ensure that if you needed me to still go to my team, I would follow up tomorrow during our team meeting.

Thanks ☺
Sheryl

Good morning and Happy Monday,

I have heard back from the BCCDC and they only offer the COVID-19 Immunization course in English. Although the feedback has been positive, it does not allow all nurse to access it. Sorry... was hoping for a different response.

If there is anything else you require from me, please let me know.

Take care,
Sheryl

I agree. If there is no French option, it does not meet a standard of training for all staff. I will keep you both posted if I find out anything.

Hi there,

We can take a look at this as well, ideally not specifically designed for novice nurses and likely different but again would not be mandatory, could be accessed by anyone who felt that they have a learning need.

I am concerned about offering the B CCDC training nationally that is not available in French.

Thanks
CC

Hi, is the info below something that will be sent out to share nationally with all the Healthcare staff?

Cindy

Good day SAC members,

Please see the message below providing you with information about the launch of the COVID-19 Vaccination Tool Kit for Health Care Providers. Please distribute this resource for health care providers to your respective PT networks.

Kind Regards,
SAC Secretariat

Public Health Agency of Canada | Agence de la santé publique du Canada

Launch of COVID–19 Vaccination Tool Kit for Health Care Providers

(le Français suit...)

Health care providers are uniquely positioned to answer questions and provide information about COVID–19 vaccination. To support them in their role, the Public Health Agency of Canada has developed a new resource titled the **COVID–19 Vaccination Tool Kit for Health Care Providers**. You can use this tool kit as a quick resource to help your patients and colleagues make informed decisions about COVID–19 vaccination by sharing credible information and resources with them.

Within the tool kit, you will find links to general information about COVID–19, an overview of authorized vaccines, guidance for managing COVID–19 vaccination clinics, an overview of vaccine safety, as well as a number of additional resources such as digital tools, communication materials, and provincial/territorial specific resources.

As new information and resources become available, the tool kit will be updated and you will be notified of the updates. We encourage you to share the tool kit broadly with your peers and your networks. Download or view:

[COVID-19 Vaccination Tool Kit for Health Care Providers.](#)

We also encourage you to share information about COVID-19 vaccination through social media and other communications channels available to you. For your convenience, we have prepared [sample social media messages and images](#) that you can use on your channels.

A separate communication toolkit has also been shared with Indigenous communities. Updated on a regular basis, it provides a variety of communication resources and information for community leaders to share, as well as guidance for creating tailored messages. Download or view:

[COVID-19 Vaccines communication tool kit for Indigenous communities.](#)

Thank you for your continued support and hard work to help educate and inform your patients about COVID-19 vaccination. We greatly appreciate the ongoing collaboration and are thankful that we can work together to reduce the spread of COVID-19 in Canada.

Lancement de la trousse à outils de vaccination contre la COVID-19 pour les fournisseurs de soins de santé

Les fournisseurs de soins de santé sont particulièrement bien placés pour répondre aux questions et fournir de l'information sur la vaccination contre la COVID-19. Pour les appuyer dans leur rôle, l'Agence de la santé publique du Canada a créé une nouvelle ressource, la **trousse à outils de vaccination contre la COVID-19 pour les fournisseurs de soins de santé**. Vous pouvez utiliser la trousse comme ressource rapide pour aider vos patients et vos collègues à prendre des décisions éclairées sur la vaccination contre la COVID-19 en leur communiquant des renseignements et des ressources crédibles.

Vous trouverez dans la trousse d'outils des liens vers de l'information générale sur la COVID-19, un aperçu des vaccins autorisés, un guide d'orientation pour la gestion des cliniques de vaccination contre la COVID-19, un aperçu de l'innocuité des vaccins et de nombreuses autres ressources comme des outils numériques, des documents de communication et des ressources propres aux provinces et aux territoires.

La trousse d'outils sera mise à jour à mesure que de nouveaux renseignements et de nouvelles ressources seront disponibles. Nous vous ferons part des mises à jour apportées le cas échéant. Nous vous encourageons à partager la trousse d'outils avec vos pairs et vos réseaux. Pour télécharger ou consulter :

[Trousse d'outils de vaccination contre la COVID-19 pour les fournisseurs de soins de santé.](#)

Nous vous encourageons également à partager de l'information sur la vaccination contre la COVID-19 par le biais des médias sociaux ou d'autres moyens de communication à votre disposition. Pour votre commodité, nous avons préparé des exemples de messages et d'images que vous pouvez utiliser sur vos réseaux sociaux.

Nous avons également fait parvenir une trousse d'outils de communication distincte aux communautés autochtones. Mise à jour régulièrement, la trousse offre diverses ressources de communication et d'information à partager par les dirigeants communautaires, ainsi que des conseils pour la création de messages personnalisés. Pour télécharger ou consulter :

[COVID-19 Trousse d'outils de communication sur les vaccins pour les communautés autochtones.](#)

Nous tenons à vous remercier pour votre soutien continu et vos efforts que vous déployez afin d'aider à informer vos patients au sujet de la vaccination contre la COVID-19. Nous vous sommes très reconnaissants de votre collaboration continue et de travailler avec vous afin de réduire la propagation de la COVID-19 au Canada.
