**VI. Testing**

- Testing will be offered to all new admissions to the WRC starting the week of June 1/20. **Non-Responsive**

## VIII. Screening

- Senior managers will send employees home if they report to work with flu symptoms.
- The Shift Operations Manager or designate at each centre will confirm (verbally) with every staff member coming on shift (or shortly after) that they are not exhibiting flu symptoms. This check will be documented.
- Infrared thermometers can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and/or for screening access to the centre.

### Screening Procedure:

Before leaving home, staff should self-assess based on the following:

Do you have...

- Fever/Chills (higher than 38 degrees Celsius)
- New or increasing cough
- Shortness of breath or trouble breathing
- Sore throat or muscles
- Headache

In the last 14 days, have you:

- Returned from travel outside of MB, except western provinces, the territories, and northwestern Ontario (West of Terrace Bay)? Note CO/JC exemption above.
- Travelled internationally in the past 14 days? If so, 14 days of self-isolation is required before returning to the centre.

- Had close contact with a confirmed case of COVID-19 while not wearing PPE or practicing social distancing?
- Had a laboratory exposure to COVID-19?

**If you have any of the above symptoms or answered ‘yes’ to any question, stay home and contact Health Links.**

Screening upon arrival:

- Centres will designate a staging area.
- Arrival times may be staged to ensure that staff arriving to work should remain 6ft apart prior to screening.
- In colder weather, you may need to wait until your skin temperature normalizes.
- Avoid drinking hot or cold liquids or smoking 15 minutes before screening.
- You will be checked for fever using infrared thermometer.
- You will be asked to confirm your pre-shift self-screening results.

**If you have a fever or other symptoms, you will be asked to apply a surgical mask and return home to contact Health Links (204-788-8200, or 1-888-315-9257).**

## **XI. Court Appearances, Police Removals, and Medical Escorts**

- Inmates/YPs returning from medical escorts with corrections staff do not generally require isolated, but should be assessed based on the following:
  - Length of the escort or time in a public setting, e.g. 12 hours or more would support isolation
  - Exposure to multiple spaces or persons in the community
  - PPE compliance during the escort
  - Supervision during the escort

Non-Responsive

- All adult admissions will be initially isolated at the WRC. Transfers from the WRC will be administered as follows:
  - Youth admissions will be immediately transferred to the MYC for 14 days of isolation, after the WRC admitting process is complete.

Non-Responsive

- Asymptomatic female population will be transferred to designated isolation overflow to WCC after 10 days of isolation (or as required) to complete their time in isolation.
- Symptomatic adult inmates will remain in isolation at the WRC until cleared, followed by transfer to other custody centres.
- Inmates/YPs must be symptom free for a minimum of 48 hours before their scheduled release from isolation.

Non-Responsive

- Inmates/YPs who become symptomatic in any custody centre will remain in that centre and be isolated for 14 days from the onset of symptoms, as assessed by medical personnel.
- Medical personnel will assess all inmates/YPs prior to transfer. However, an inmate/YP who is placed in asymptomatic isolation, and remains asymptomatic, does not require a medical assessment before release from isolation.

## **VIII. Screening**

- Senior managers will send employees home if they report to work with flu symptoms.
- We have conducted staff screening including temperature checks since the start of the pandemic.
- At start of the pandemic and through the summer, we needed the tangible reminder to staff to stay home when sick. With the current wave in the community and our correctional centres being hit fairly hard, staff are more than aware of this necessity.
- To be clear, staff must stay home when you have cold or flu symptoms. If you attend work and start experiencing symptoms, then you must notify your supervisor and make arrangements to go home. In these cases we would expect staff to self isolate and get a COVID test. If you see a fellow staff member who appears ill, please gently approach and ask if they are feeling unwell and to suggest they leave the workplace. Managers and Supervisors are responsible for looking for this as well.
- Starting Thursday November 5, we will stop the temperature screening and most centres will withdraw staff who are conducting the screening. Staff will be expected to self assess before each shift and at some points it is expected that the Duty Officer or another staff will randomly or regularly check with staff coming to work to ensure they are not experiencing cold or flu like symptoms. It is imperative that all centres have signage with the COVID self assessment questions clearly visible.
- Contractors and other non-Corrections staff who attend the centres will need to directly answer the self assessment questions with the Duty Office or similar area.

### **Screening Procedure:**

Before leaving home, staff should self-assess based on the following:

Do you have:

- Fever/Chills (higher than 38 degrees Celsius)
- New or increasing cough
- Shortness of breath or trouble breathing
- Sore throat or muscles
- Headache

In the last 14 days, have you:

- Returned from travel outside of MB, except western provinces, the territories, and northwestern Ontario (West of Terrace Bay)? Note CO/JC exemption above.

- Had close contact with a confirmed case of COVID-19 while not wearing PPE
- Had a laboratory exposure to COVID-19?

**If you have any of the above symptoms or answered ‘yes’ to any question, stay home and contact Health Links.**

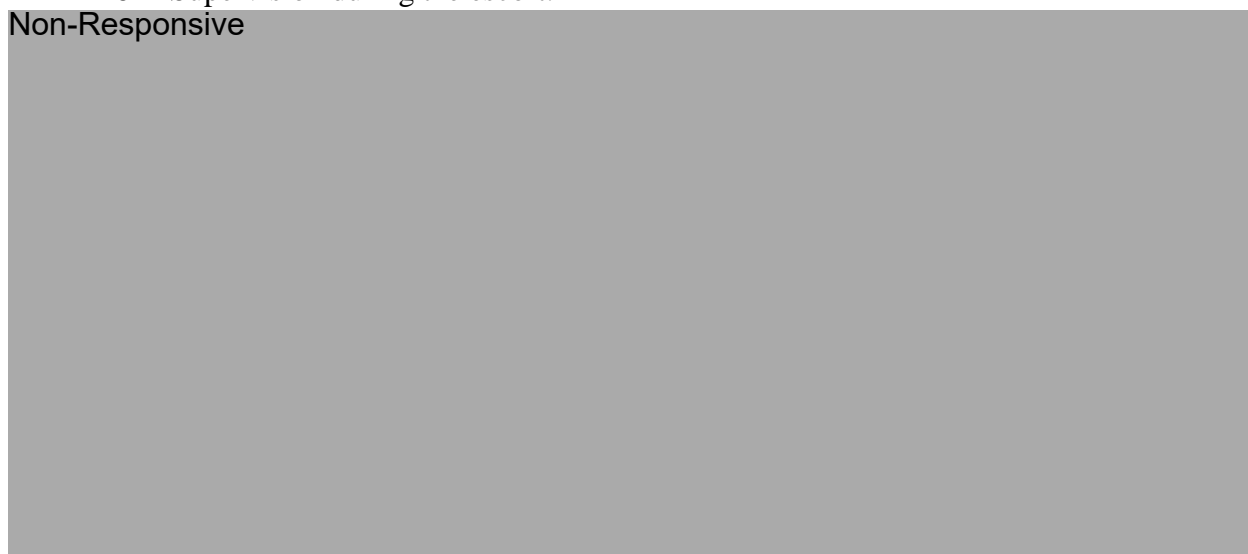

Non-Responsive

## **VIII. Isolation**

### **i. Staff self-isolation**

- Persons (including staff) who travel internationally are required to self-isolate for 14 days upon return to Canada. Staff who are planning to travel internationally are required to advise the employer immediately. Upon return, staff will be required to use banked leave for the quarantine period unless symptoms develop. Those without available leave will be unpaid.
- Public health officials are advising that anyone who is symptomatic, or has a household member who is symptomatic, the entire household needs to self-isolate. Correctional staff / Nurses are considered first responders for this purpose and therefore are not required to self-isolate if they have no symptoms in this situation.
- Staff will be advised to follow the directives given by Health Links for their individual case.
- Each employee's personal health information is theirs to manage however if an employee is tested for COVID 19, they are obligated to provide the test result to the employer. Personal health information will not be shared by the employer with other employees unless permission is granted.

### **ii. Inmate Isolation**

- An inmate that has tested positive and is in isolation can be cleared by medical using the following criteria:
  - For symptomatic cases:
    - at least 10 days have passed since onset of first symptom,
    - the case did not require hospitalization,
    - No fever and the inmate has improved clinically,
    - absence of cough is not required for those known to have chronic cough or for those who are experiencing reactive airways post infection.
  - For asymptomatic cases:
    - at least 10 days have passed since the specimen collection date of the confirmatory laboratory sample.
    - Anyone with persistent symptoms at day 10 (e.g. fever, increasing shortness of breath, fatigue), aside from a reactive airway cough, should have a prompt clinical assessment. Individuals who remain symptomatic at day 10 should also continue on active daily monitoring until symptoms have resolved for 24 hours.

Non-Responsive

**iii. Medical Escorts**

- Inmates/YPs returning from medical escorts with corrections staff do not generally require isolated, but should be assessed based on the following:
  - Length of the escort or time in a public setting, e.g. 12 hours or more would support isolation.
  - Exposure to multiple spaces or persons in the community.
  - PPE compliance during the escort.
  - Supervision during the escort.

**C. Isolation & Transfers**

- All adult admissions will be initially isolated at the WRC. Transfers from the WRC will be administered as follows:
  - Youth admissions will be immediately transferred to the MYC for 14 days of isolation, after the WRC admitting process is complete.

Non-Responsive

- Once male adult inmates have completed their 14 day isolation period, they will be transferred to HCC or TPCC.

- Asymptomatic female population will be transferred to designated isolation overflow to WCC after 10 days of isolation (or as required) to complete their time in isolation.
- Symptomatic adult inmates will remain in isolation at the WRC until cleared, followed by transfer to other custody centres.
- Inmates/YPs must be symptom free for a minimum of 48 hours before their scheduled release from isolation.

#### Non-Responsive

- Inmates/YPs who become symptomatic in any custody centre will remain in that centre and be isolated for 14 days from the onset of symptoms, as assessed by medical personnel.
- Medical personnel will assess all inmates/YPs prior to transfer. However, an inmate/YP who is placed in asymptomatic isolation, and remains asymptomatic, does not require a medical assessment before release from isolation.
