

Nonresponsive

New Emerging Issues:

- Custody is experiencing critical toilet paper shortages at all nine of their correction centers.
- Many common items such as toilet paper, hand sanitizer, wipes and disinfectant are currently on back order nationally.

Impacts: Staffing

- Work alone procedures should be considered by management if office personnel is reduced to only one employee at a time. Community Corrections will share their lone-worker protocols.

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

Mitigation Measures:

- (LVI) Lawyer Video interviewing issues resolved at WRC and BCC. Synergy phone system upgrades. Cordless phone improvements underway. Equipment coming from the USA.

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

General:

Nonresponsive

- Custody received hand sanitizer product from a distillery. Going forward, all distillery product is being routed to shared health services to be dispersed by priority. Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

Mitigation Measures:

- In light of critical cleaning supply shortages, ASD is working with custody on proper disinfection procedure for isolation cells in custody.
- The World Health Organization has provided guidelines for use of bleach to sanitize and will be shared with the department.

Nonresponsive

New Emerging Issues:

- The number of inmates in isolation is increasing daily; currently there are 18.

Nonresponsive

Nonresponsive

Nonresponsive

Mitigation Measures:

- Sheriffs are asking common screening questions upon entry to courts/correction centres which is helping to alleviate prosecutions labour unrest about workplace safety and health conditions.

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

Central Government Update and Key Messages (Maria Campos):

-

Nonresponsive

Nonresponsive

- Sheriff Services is promoting the use of video and teleconference over in-person appearances, and is booking flights for lengthy northern transports as opposed to driving. Proper PPE is available to staff and prisoners during transport.

Nonresponsive

General:

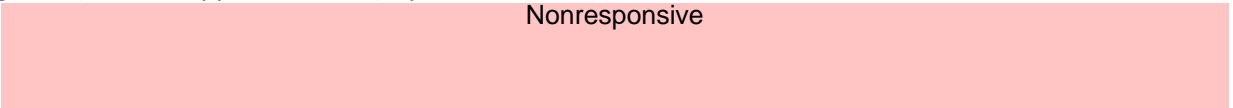

- Courts, Crown Law, Custody, and Policing are working to address issues resulting from admissions exclusively through Winnipeg Remand Centre and suspension of direct lock-ups.

Nonresponsive

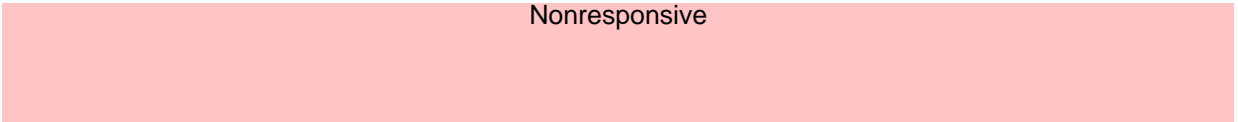

Logistics (Critical Supplies and PPE) Update:

Nonresponsive

- Compiling and adjusting Custody Food Service’s essential product lists, including food service disposable “Clam Shells”, disposable cutlery, commercial dish-washer detergents, and toilet paper for usage across all 9 correctional centres.

Nonresponsive

Nonresponsive

Nonresponsive

Logistics (Critical Supplies and PPE) Update:

Nonresponsive

- Custody healthcare supplies have been re-ordered. Surgical masks were supplied on the last delivery and it is anticipated that N95 masks for nurses will be supplied on the next shipment.

Nonresponsive

Nonresponsive

Nonresponsive

Logistics (Critical Supplies and PPE) Update:

Nonresponsive

- Custody healthcare and Correctional Officer presence on isolation units has been identified and submitted to Shared Health Coordination.

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

New Emerging Issues:

- Youth bail hearing today that may impact how custody is utilizing new admissions to provincial custody. The WRC for a single point of entry for all new admissions including youth.
- The YCJA calls for youth to be housed apart and separate, ruling today may impact how and or where youth entering provincial custody are managed under Pandemic conditions.

Nonresponsive

Nonresponsive

Logistics Update (Critical Supplies and PPE):

- Eye protection and gloves were issued to Sheriffs and Protection Services Northern Operations (The Pas, Thompson).

Nonresponsive

New Emerging Issues:

- The Youth Criminal Justice Act (YCJA) presents implications for current intake processes at WRC. The matter is under review by Legal Services Branch and a position will be adopted moving forward that will satisfy the public health perspective regarding isolation of youth brought into custody.

Nonresponsive

Nonresponsive

General Update:

- Inmate counts continue to decrease in custody.

Nonresponsive

New Emerging Issues:

- Changes to youth being remanded in custody:
 - o All remanded youth entering provincial custody will be initially processed at WRC and transferred to MYC via a controlled inter-facility transfer.
 - o Youth currently housed at WRC will also be transferred to MYC.
 - o To reduce the likelihood of transmission, new youth admissions will be isolated in a separate cottage at MYC.

Nonresponsive

Service Change Tracking:

- One new service change for April 16, 2020:
 - o Probation Officers at the Restorative Justice Centre are launching group domestic violence programs as well as support from interpreters through video conferencing. Other Probation Officers are facilitating videoconferencing where possible and through group teleconference in areas where internet is limited.

Nonresponsive

Speaking Points:

- **Starting Friday, April 17, young people entering custody will be housed at the Manitoba Youth Centre. Initial processing will still occur at the Winnipeg Remand Centre to ensure screening is conducted appropriately. Once processed, the youth will be transported to the Manitoba Youth Centre and isolated on site for 14 days to comply with public health recommendations. This continues to be a temporary measure in place during the pandemic to ensure that the risk to our young offenders and our youth facilities is reduced.**
- **Service providers across Manitoba Justice continue to adapt service delivery to the realities presented by COVID-19. For the most up to date information on government services, please visit the Government of Manitoba website at www.gov.mb.ca.**

Cautionary Note:

The media has demonstrated significant interest in the youth custody admissions process. At this time, changes to youth admissions have not expressly been made public. Defense counsel and Legal Aid Manitoba are aware of the changes to procedure as described above, and the CBC has reported on this item based on an internal memo they received.

Nonresponsive

Logistics Update (Critical Supplies and PPE):

- Logistics is resourcing supplies based on need for front line services. Probations, Correctional Centres, Sheriffs, and Protective Services will receive limited supplies this week. By April 24, reusable masks should be available for Sheriffs, Protective Services, and First Nations Safety Officers.
- Custody Healthcare has not received medical supplies since March 28, 2020. Until a new shipment is received, Custody Healthcare units will be topped up with supplies currently stocked at 405 Broadway.

Nonresponsive

- PPE back-orders for Custody have been cancelled. Supplies will be diverted to Alan Peacock's office for coordination across the nine correctional centres internally.

Nonresponsive

Nonresponsive

Nonresponsive

Nonresponsive

General Update:

- The number of inmates in custody continues to decrease.

Nonresponsive

Logistics Update (Critical Supplies and PPE):

Nonresponsive

- There is a three week waiting period for locally made reusable medical examination gowns for Custody Healthcare.
- Sheriff Services operations and Custody centres in the west and the north will receive limited orders of disposable gloves and operational PPE today, including coveralls for isolation units.

New Emerging Issues:

- Custody Healthcare medical supplies were last received on March 28, 2020 and critically low. Existing supplies are being redistributed to top up certain areas, however an injection of supplies from the Shared Health Pandemic Stockpile will be necessary by Thursday April 23, 2020 to maintain protection measures within custody medical and isolation operations.

Nonresponsive

Nonresponsive

Nonresponsive

General Update:

- The number of inmates in custody continues to decrease. On average, custody counts have decreased by approximately 12.7 inmates per day since April 7, 2020.

Nonresponsive

Logistics Update (Critical Supplies and PPE):

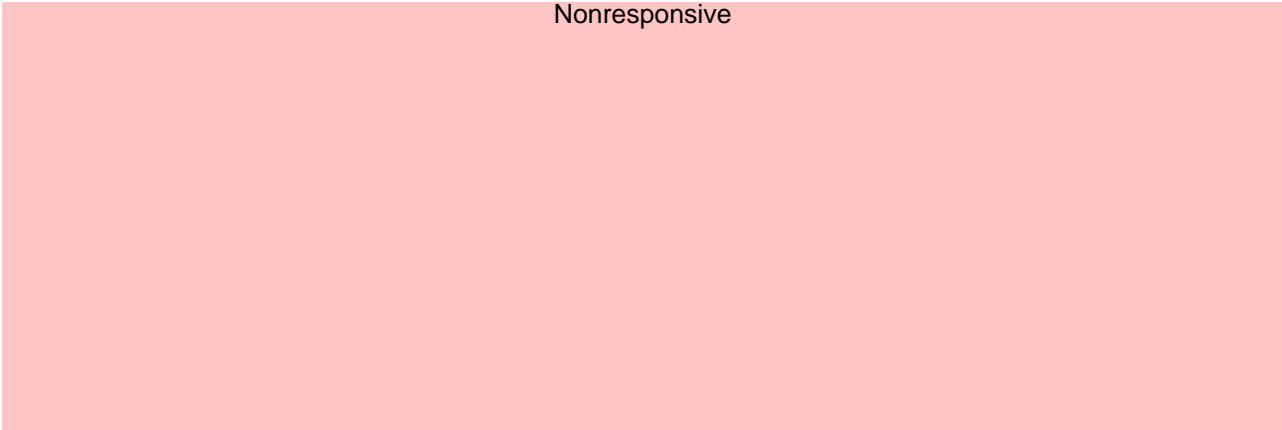

Nonresponsive

- Pails of hand sanitizer will be distributed to the custody healthcare units out of HCC outdoor storage units. Looking into dispensing this product into smaller containers that are available.

Nonresponsive

Nonresponsive

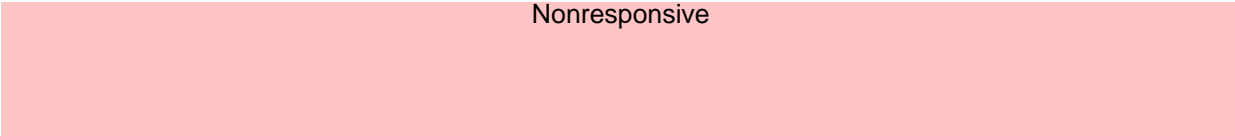

Nonresponsive

Logistics Update (Critical Supplies and PPE):

- Shared Health acknowledged receipt of Custody Healthcare order, but the April 23 delivery did not show up.

Nonresponsive

Nonresponsive

Manitoba Justice COVID-19 Central Coordination Team (JCCT)
Status Update 29 – April 24, 2020

Central Government Update and Key Messages (Maria Campos):

Nonresponsive

- In order to eliminate spreading of COVID-19 between sites, nurses working in personal care homes are only to work in one location during the crisis. Corrections is to be aware that this may affect nurses working in custody medical units and that personal information must remain protected when inquiring of their situation.

General Update:

Nonresponsive

- Updates have informed that there are no major concerns for electrical work scheduled at WRC.

Logistics Update (Critical Supplies and PPE):

- Custody Healthcare units received supplies from shared health services yesterday afternoon with additional supplies received this morning.

Nonresponsive

Nonresponsive

Nonresponsive

General Update:

- Probation requested approved screening health questions in use that can support their screening clients for in person appointments. Sheriff and ASD screening questions source and provided.

Nonresponsive

Nonresponsive

General Update:

Nonresponsive

- Corrections Health Services is aware of the directive restricting medical staff working in more than one healthcare location, to one primary location. Continued efforts are being made to adjust schedules and ensure adequate staffing of medical units throughout our provincial facilities.

Nonresponsive

Logistics Update (Critical Supplies and PPE):

Nonresponsive

- Sheriff Services and Protective Services was issued full PPE on May 1. Sheriffs also received additional gloves for dealing with symptomatic inmates. PPE can include: reusable full face shield, eye protection, reusable masks, Nitrile gloves, and disposable coveralls.

Nonresponsive

Nonresponsive

Nonresponsive

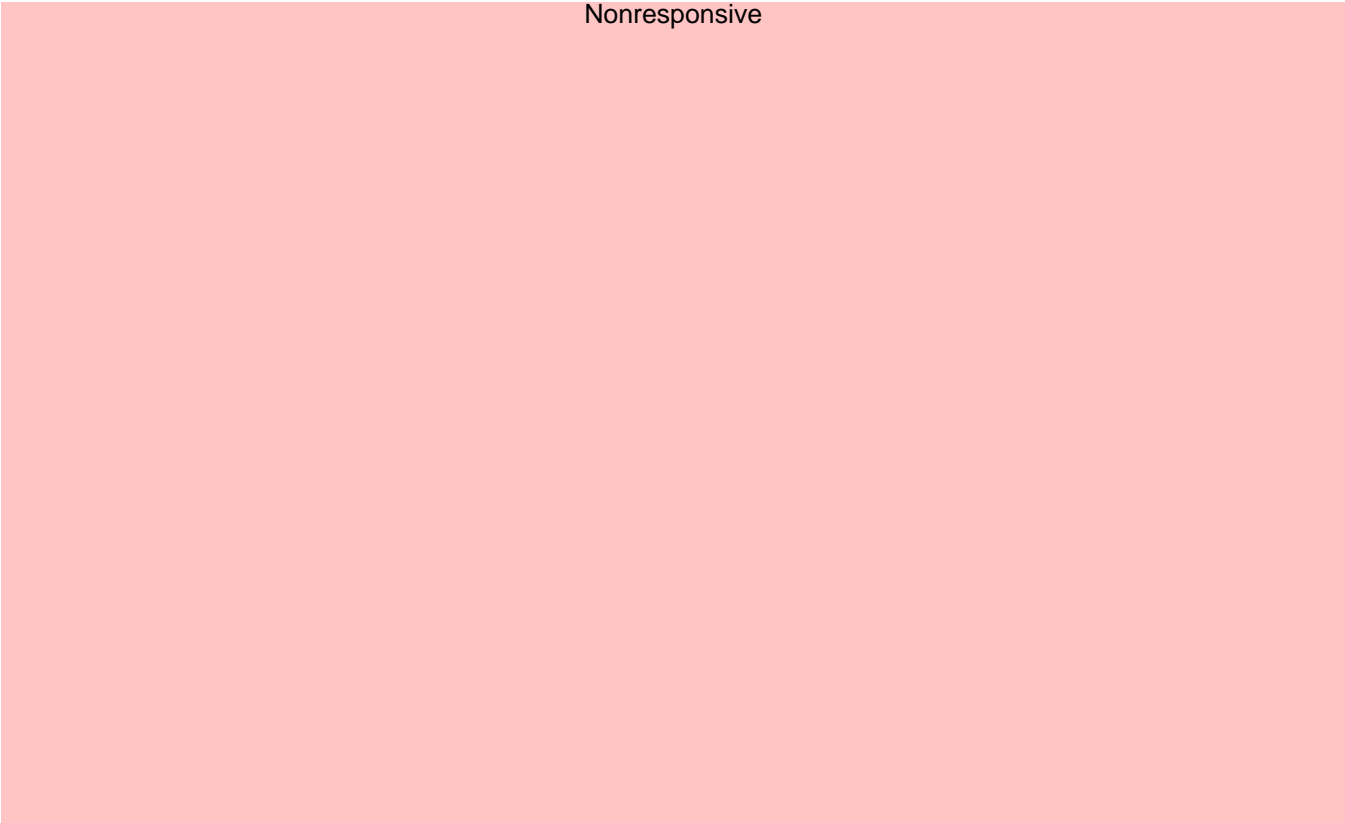

Nonresponsive

Logistics Update (Critical Supplies and PPE):

- Hand sanitizer has been issued to Civil Service Commission, Prosecutions, Courts, Community Corrections, Custody, Sheriffs, and Corporate and Strategic Services. This will be expanded to other branches as more product comes in later this week.
- Alcohol based disinfectant is in stock. Ethyl alcohol, isopropyl alcohol, water and hydrogen peroxide this is an excellent product for wiping down surfaces using paper towels.
- 275 gallons of Environize Anolyte is in stock. This is a Broad Spectrum Anti-Viral and Sporicidal Disinfectant for use on non-porous surfaces. To receive it, bring opaque containers to be filled.
- Critical PPE has been issued to all front line operations that work with members of the public within 2 meters (Sheriffs, Policing and Public Safety, Protection Services, Correctional Officers, Correctional Healthcare/Nurses). First Nations Safety Officers can have access to increased PPE as required (Full Face Shields) as their role expands

 - **Doctors are directing medical isolation for inmates that are exhibiting flu/cold symptoms as a precautionary approach. The number of inmates on medical isolation is increasing daily (currently 31; increase of 13 from yesterday); 3 have been formally tested:**
 - **WRC 19 - 1 inmate tested March 30 will be removed from isolation if well**
 - **BCC 2 - 1 inmate tested**
 - **HCC 7 - 0 tested**
 - **WCC 2 - 1 tested**
 - **TPCC 1 - 0 tested (youth under observation)**
 - **128 officers across the system are on self-isolation (travel, contact with people with flu, sick with flu like symptoms, colds) COVID-19 testing now a priority for Correctional Officers.**
 - **Two full-time nurses resigned in the past two weeks.**
 - **There are critical shortages of masks and eye shields in 7 of the 9 Centres.**
 - **Labour issues are occurring from day-to-day and require weekly Workplace Health and Safety updates and meetings being facilitated by Superintendents.**
 - **Custody is changing Operations daily to meet needs of agencies and programming that cannot attend the centre by choice or due to COVID-19 restrictions.**
 - **Working on a process for Legal Aid at MYC with Sam Raposo**
 - **Correctional Managers are working with staff to increase activity for inmates who are now confined for longer periods as we are breaking in much smaller groups. Code Responder PPE requirements are under review those responding to isolation units.**
 - **Looking at providing inmates different options for Synergy use (phone packages)**
 - **Security Risk Assessments are running from low to medium across all 9 centres**
 - **Custody Release planning is a challenge for those inmates being released to the Northern Communities that have now closed external access. Many of these communities are resistant to taking offenders back under normal circumstances thereby making release planning more complex and challenging for Northern Centres**
 - **Senior Manager Team's in each Centre are staggering shifts to ensure there is a presence where possible**
 - **Supplies and food deliveries are being received however, many items on back order. Food Services Managers and David Wainwright (Food Services Coordinator) are being creative with menu planning**
 - **Only The Pas has received communication from their ASD Facility Manager on maintenance staff attending the Centre when there is COVID-19 presence**
 - **UTA plan on track (15) day end of sentence place marker**
 - **Medical Supplies and PPE are getting critically low and will become an issue as numbers increase.**
 - **Movement internally is being reduced as much as possible. Recreation / Gyms were closed (Fresh-air activities only)**

JCCT - Justice Central Coordination Team - COVID-19
Current Status Operations Update – March 27, 2020

- The following Correctional Centres do not have the ability to provide non-contact interview space: AYC, MYC, DCC and TPCC. Recommending transition to use Lawyer Video Interviewing technology, Video Court and phone for external interview purposes.
 - External Transfers has to be deemed essential
 - Operations are being changed daily at every centre to meet the fluid change / challenges that are evolving
 - Temporary Absences are being utilized for sentenced adult inmates with 14 days or less remaining before their scheduled Earliest Release Date. 23(1)(a)
- Expanded Temporary Absence provisions are being explored for the female population and release of Open Custody youth is underway, subject to stable residence.
- Probation Services:
- In-person supervision meetings with young persons/offenders are occurring in alignment with social distancing guidelines. All units have glass barriers for in person short-term client contacts with the exception of First Nation communities where telephone reporting is being conducted.
 - First contact/custody releases are instructed to report in person to Probation Units and then provided ongoing supervision directions
 - Minimized prolonged (more than 10 minutes), close (less than two meters/ six feet) contact between other individuals. Driving young persons/offenders has been put on hold in consideration of these guidelines.
 - Group programs for young persons/offenders and large group training session have been cancelled until further notice. Staff training has been postponed.
 - Staff and community partner meetings have been moved to email skype and phone methods of communication.
 - One hundred and fifty phones have been ordered for young person/offender use. In situations where a young person/offender does not have a private phone and is determined to be a very high risk/need, a phone will be made available on a case-by-case basis to maintain supervision/contact with Probation Services.
 - Work from Home is now at 25% staffing on a rotational basis under the supervision of managers.

 - Staff and community partner meetings have been moved to email skype and phone methods of communication.
 - One hundred and fifty phones have been ordered for young person/offender use. In situations where a young person/offender does not have a private phone and is determined to be a very high risk/need, a phone will be made available on a case-by-case basis to maintain supervision/contact with Probation Services.
 - Work from Home is now at 25% staffing on a rotational basis under the supervision of managers.

Community Safety Division:

- Custody:
 - Doctors are directing medical isolation for inmates that are exhibiting flu/cold symptoms as a precautionary approach. Below is a breakdown as of April 1, 2020:

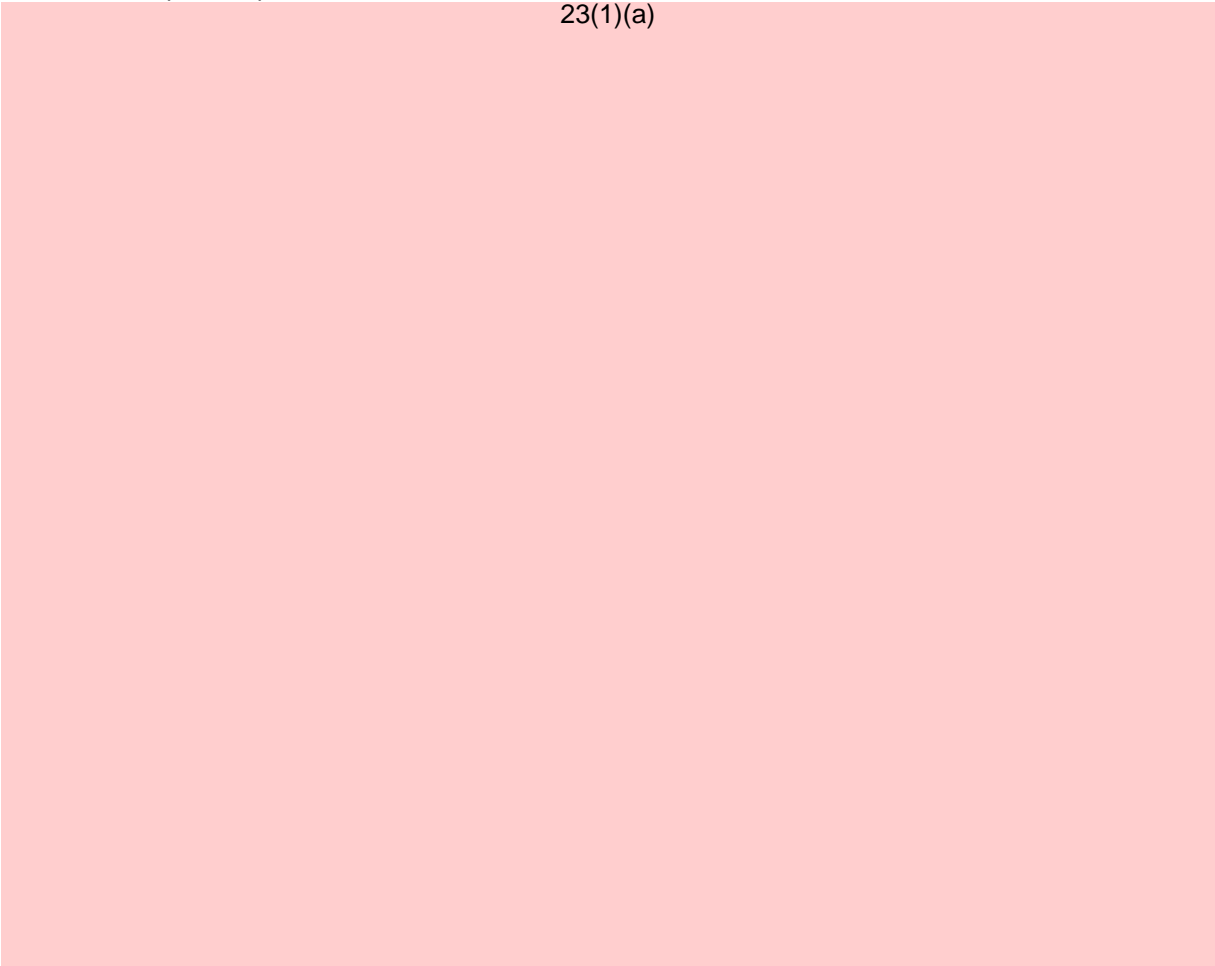

Correctional Centre	Medical Isolation	Tested	Positive
AYC	0	0	0
BCC	3	2	0
DCC	1	0	0
HCC	1	0	0
MRCC	4	2	0
MYC	0	0	0
TPCC	1	1	0
WCC	3	2	0
WRC	21	4	0
Total	34	11	0

- As of April 1, 2020, two nurses have resigned and 150 correctional officers are self-isolating.
- Effective April 2, 2020, all new admissions will be processed through the Winnipeg Remand Center and it will house new arrestees who have had a bail hearing for the 14-day isolation period. No direct lock-ups or non-criminal detentions will be admitted to provincial custody for the interim.
- Effective April 2, 2020, professional visits by lawyers are cancelled at Winnipeg Remand Centre; phone and video interviews are available.
- As of March 31, 2020, all public visiting has been cancelled at all youth and adult custody centres. Access to the centres will continue for essential services only.

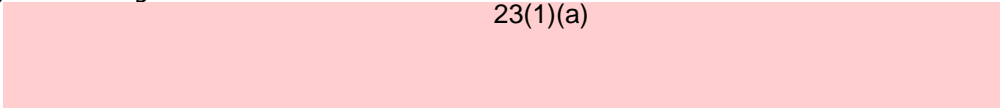

JCCT - Justice Central Coordination Team - COVID-19
Current Status Operations Update – April 1, 2020

- Partitions between passenger and driver in prisoner escort vehicles being investigated. Justice has shared information for product and installation with VEMA.
- Centre management staff is staggering shifts to ensure presence where possible.
- Inmate movement is being reduced as much as possible. Recreation/gyms are closed and fresh-air activities available only. Staff attempting to increase activity for inmates who are now confined for longer periods.
- Temporary absences are being utilized for early release with eligible inmates that have 14-days or less remaining before their scheduled Earliest Release Date
- *Community Corrections/Probation Services:*
 - The Restorative Justice Branch continues to work with all of its restorative justice partners. All group programming is suspended; other meetings are taking place virtually.
 - In-person supervision meetings and other service delivery is being done virtually or with glass barriers for in person short-term client contacts.
 - Phones have been provided for young person/offender use in high risk situations where a private phone is not available to maintain contact with Probation Services.

- Doctors are directing medical isolation for inmates that are exhibiting flu/cold symptoms as a precaution. Below is a point-in-time breakdown for April 16, 2020:

Correctional Centre	Custody Count	Medical Isolation	Flu-like Symptoms	Tested	Positive
AYC	45	3	2	3	0
BCC	260	0	0	0	0
DCC	29	1	0	0	0
HCC	666	6	3	6	0
MRCC	391	3	1	1	0
MYC	24	0	0	0	0
TPCC	97	0	0	0	0
WCC	200	1	1	1	0
WRC	118	118	15	23	0
Total	1830	132	22	34	0

As of April 16, 2020, WRC has 118 of 225 (52%) individual isolation cells in use

As of April 16, 2020, count of inmates: 1761 adult; 69 youth

As of April 15, 2020: 98 staff are on self-isolation (updates available Mon, Wed, Fri only)

- The Pandemic Operations plan from April 8 will be updated and re-shared with staff.
- All centres are now conducting screenings of staff/personnel entering the premises. Staff start times are staggered to ensure compliance with social distancing.
- Staff masks continue to be made. Masks have been provided to HCC, WRC, WCC; AYC and MYC should receive masks today and MRCC tomorrow.

- **Several new measures are being taken at the recommendation of Public Health:**
 - **Consolidation of symptomatic inmates at WRC (may affect other centres subject to isolation numbers).**
 - **Enhanced PPE for officers working with symptomatic inmates, where supplies exist.**
 - **Looking into locally made reusable examination gowns to address shortages**
 - **Continuous PPE use was stressed (once PPE is put on, it should remain on as long as possible)**

Community Safety Division:

- Custody:
 - o Number of inmates on medical isolation increasing daily (currently 18). PPE will become an issue as numbers increase.
 - o Medical Supplies are getting critically low
 - o Movement internally is being reduced as much as possible
 - o Recreation / Gyms were closed (Fresh-air activities only)
 - o The following Correctional Centres do not have the ability to provide non-contact interview space: AYC, MYC, DCC and TPCC. Recommending transition to use Lawyer Video Interviewing technology, Video Court and phone for external interview purposes.
 - o External Transfers has to be deemed essential
 - o Operations are being changed daily at every centre to meet the fluid change / challenges that are evolving
 - o Temporary Absences are being utilized for sentenced adult inmates with 14 days or less remaining before their scheduled Earliest Release Date. [REDACTED]
 - o [REDACTED] 23(1)(a) [REDACTED] Expanded Temporary Absence provisions are being explored for the female population and release of Open Custody youth is underway, subject to stable residence.

- Probation Services:
 - o In-person supervision meetings with young persons/offenders are occurring in alignment with social distancing guidelines. All units have glass barriers for in person short-term client contacts with the exception of First Nation communities where telephone reporting is being conducted.
 - o First contact/custody releases are instructed to report in person to Probation Units and then provided ongoing supervision directions
 - o Minimized prolonged (more than 10 minutes), close (less than two meters/ six feet) contact between other individuals. Driving young persons/offenders has been put on hold in consideration of these guidelines.
 - o Group programs for young persons/offenders and large group training session have been cancelled until further notice. Staff training has been postponed.
 - o Staff and community partner meetings have been moved to email skype and phone methods of communication.
 - o One hundred and fifty phones have been ordered for young person/offender use. In situations where a young person/offender does not have a private phone and is determined to be a very high risk/need, a phone will be made available on a case-by-case basis to maintain supervision/contact with Probation Services.
 - o Work from Home is now at 25% staffing on a rotational basis under the supervision of managers.

Community Safety Division Overview – COVID 19 – March 17, 2020

Nonresponsive

**Community Corrections Branch
Probation Services & Restorative Justice**

The following strategies are in place in Probation Offices & the RJC throughout the province:

1. In person supervision meetings with young persons/offenders are occurring in alignment with social distancing guidelines.
 - Minimized prolonged (more than 10 minutes), close (less than two meters/ six feet) contact between other individuals.
 - i. Driving young persons/offenders has been put on hold in consideration no these guidelines.
2. Group programs for young persons/offenders have been cancelled for the next month.
3. Large Group training sessions in March have been cancelled. Staff training in April being postponed.
4. Staff and community partner meetings have been moved to email, skype, phone methods of communication.
5. 150 phones have been ordered for young person/offender use. In situations where a young person/offender does not have a private phone and is determined to be a very high risk/need, a phone will be made available on a case by case basis to maintain supervision/contact with Probation Services. This is being done in anticipation of further prevention/social distancing measures being put in place.
6. BCP plans have been reviewed and strategies to prioritize business functions with reduced office attendance and work from home alternatives are being finalized.
7. Travel to First Nations communities and remote office locations are being assessed on a location by location basis in consultation with Chief and Council.

Community Safety Division Overview – COVID 19 – March 17, 2020

Protective Services – Update pending

Custody

General	Direct staff to consult Health Links or another medical professional about whether they should self-isolate/monitor, or if they believe they were exposed. Avoid giving medical advice.
	PHIA still applies and it is important that we protect personal information during this process. Any notifications about possible exposure will be managed by health authorities.
	Expect supply chains to be disrupted in the coming weeks.
Isolation	<i>Through your health services departments</i> , continue to identify and isolate inmates with flu symptoms as much as possible. Masking of ill inmates is advised.
	Identify isolation areas in your centres or begin generating this space. Anticipate greater demand for isolation over time.
Distancing & Movement	Volunteer access for contact visits with inmates/young persons are suspended.
	All contact visiting is suspended, with the exception of legal services. LVI and phone services should be encouraged as much as possible.
	All contact visits are suspended effective Wednesday, March 18.
	All staff training events are suspended.
	Central training classes are suspended and trainers will be redeployed. Recruitment interviews are suspended.
	Cancel all non-essential escorts.
Inmate programs are suspended effective Wednesday, March 18. Access to recreation will continue, but group size should be minimized and other services should be individualized as much as possible.	
Admissions	Prisoners who have travelled internationally within the last 14 days and have flu like symptoms will not be admitted without medical clearance (i.e.. no COVID-19 present).
Communications	Regular updates are being forwarded to the MGEU.
	Ensure that hygiene and cough/sneezing etiquette information is posted in all areas.
	Phone system message regarding proper hygiene is in process. It is important that you make soap products available to your custody population.

Community Safety Division Overview – COVID 19 – March 17, 2020

	Expansion of free calling is being coordinated for centres who cannot provide non-contact visiting (5 free calls/day, all inmates/residents).
External Agencies & Jurisdictions	Division is monitoring the response of other jurisdictions on a daily basis.
	Canada Post reports business as usual and no increased risk associated with mail handling.
Cleaning/Supplies	Regular cleaning with detergents remains an effective tool. Sanitizing may also be done with regular bleach diluted in water (1:10). Specialized products are not required.
	Fit testing equipment is not available or advised at this time. Regardless, mask usage is most effective for those who are presenting symptoms.
	Continue with aggressive cleaning schedules in all areas. This should include non-contact visiting space and escort vehicles. Hire additional trusties as required.
	A shortage of protective gear is being reported across all sectors and it is unlikely that we will be able to easily replenish existing supplies. Please manage your supply of masks/gloves carefully.
	<p><u>Escort Vehicle Cleaning Procedure:</u></p> <p>PTCU (Prisoner Transport Containment Unit) – Completed after each escort.</p> <ul style="list-style-type: none"> • Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended). • Let the spray sit for ten minutes then wipe down. • Sweep out the interior. <p>Officer seating area – Completed at the end of shift.</p> <ul style="list-style-type: none"> • Spray all non-porous/hard surfaces with a disinfectant spray. Let the spray sit for ten minutes then wipe down. • Sweep out interior. • Remove all garbage.
	Several centres have purchased infrared thermometers and all centres are encouraged to obtain these while they are still available. These devices can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and persons accessing the centre.
Future Measures	It is likely that the suspension of activities and services in the community, combined with self-isolation, will affect our ability to fully staff our centres. If this occurs, unit lock-downs, closures, inmate transfers, and static security models may be deployed.

Community Safety Division Overview – COVID 19 – March 17, 2020

	<p>Contract nursing resources are being explored.</p> <p>UTAs are being explored for different segments of the sentenced population.</p> <p>AYC is tentatively designated as an isolation zone, depending on the number of cases we encounter at each centre. In this scenario, youth would be transferred to MYC and sick inmates would be transferred to AYC for monitoring.</p>
Staff	<p>Staff who are ill should remain home. SMT can direct ill employees home as needed.</p> <p>Any staff returning from international travel are required to self-isolate for 14 days (from arrival date) and should not report for work during this time.</p> <p>Work from home options should be explored.</p> <p>Use of leave banks is flexible including advance of 20/21 annuals. Suspend all time limits for stat and OT banks.</p> <p>For PT staff who are required to self-isolate, remove all shifts in the affected pay period and mark the staff off sick for the full PP, which would allow the staff to receive SL pro-rated against their hours averaged over the previous 8-week period.</p> <p>Sick notes will not be required for the interim. Statutory declarations will be required, based on staff and SMT signature only.</p>
UTA (Emergency Provisions)	<p>Intermittent sentences are suspended until further notice. These dispositions should be end dated as they reach the ERD.</p> <p>Division is currently exploring the authorization of UTAs for sentenced inmates with 7 days or less remaining before their scheduled ERD. To be reviewed on Monday, March 23.</p>
Hospital access (escorts)	<p>The HSC has designed entry points and screening for all incoming patients. Additional information from other hospitals and PX3 are pending.</p>

March 17/20

Attached is the updated pandemic information. Just a couple of changes over the past 24 hours:

- Escort vehicle cleaning instructions were added to the pandemic operations. Based on shortages of cleaning products normally used for this task.
- PT payroll process for those who are self-isolating – included in the operational and FAQ document.

Attached is an FAQ for staff. This document combines information we have received from other departments and our own centres. Please note that expansion of UTAs is pending final decision and we may not proceed with this plan until next week.

The plan is to post these documents to the website for all staff to reference, but this may take a day or two. Once live, I will send out a global communication. You can action or share this information in the interim at your discretion.

Direct staff to consult Health Links or another medical professional about whether they should self-isolate/monitor, or if they believe they were exposed. Avoid giving medical advice.

PHIA still applies and it is important that we protect personal information during this process. Any notifications about possible exposure will be managed by health authorities.

Expect supply chains to be disrupted in the coming weeks.

<i>Through your health services departments, continue to identify and isolate inmates with flu symptoms as much as possible. Masking of ill inmates is advised.</i>

Identify isolation areas in your centres or begin generating this space. Anticipate greater demand for isolation over time.

Volunteer access for contact visits with inmates/young persons are suspended.

All contact visiting is suspended, with the exception of legal services. LVI and phone services should be encouraged as much as possible.

All contact visits are suspended effective Wednesday, March 18.

All staff training events are suspended.

Central training classes are suspended and trainers will be redeployed. Recruitment interviews are suspended.

Cancel all non-essential escorts.

Inmate programs are suspended effective Wednesday, March 18. Access to recreation will continue, but group size should be minimized and other services should be individualized as much as possible.

Prisoners who have travelled internationally within the last 14 days and have flu like symptoms will not be admitted without medical clearance (i.e.. no COVID-19 present).

Regular updates are being forwarded to the MGEU.

Ensure that hygiene and cough/sneezing etiquette information is posted in all areas.

Phone system message regarding proper hygiene is in process. It is important that you make soap products available to your custody population.

Expansion of free calling is being coordinated for centres who cannot provide non-contact visiting (5 free calls/day, all inmates/residents).

Division is monitoring the response of other jurisdictions on a daily basis.

Canada Post reports business as usual and no increased risk associated with mail handling.

Regular cleaning with detergents remains an effective tool. Sanitizing may also be done with regular bleach diluted in water (1:10). Specialized products are not required.

Fit testing equipment is not available or advised at this time. Regardless, mask usage is most effective for those who are presenting symptoms.

Continue with aggressive cleaning schedules in all areas. This should include non-contact visiting space and escort vehicles. Hire additional trusties as required.

A shortage of protective gear is being reported across all sectors and it is unlikely that we will be able to easily replenish existing supplies. Please manage your supply of masks/gloves carefully.

Escort Vehicle Cleaning Procedure:

PTCU (Prisoner Transport Containment Unit) – Completed after each escort.

- Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended).
- Let the spray sit for ten minutes then wipe down.
- Sweep out the interior.

Officer seating area – Completed at the end of shift.

- Spray all non-porous/hard surfaces with a disinfectant spray. Let the spray sit for ten minutes then wipe down.
- Sweep out interior.
- Remove all garbage.

Several centres have purchased infrared thermometers and all centres are encouraged to obtain these while they are still available. These devices can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and persons accessing the centre.

It is likely that the suspension of activities and services in the community, combined with self-isolation, will affect our ability to fully staff our centres. If this occurs, unit lock-downs, closures, inmate transfers, and static security models may be deployed.

Contract nursing resources are being explored.

UTAs are being explored for different segments of the sentenced population.

AYC is tentatively designated as an isolation zone, depending on the number of cases we encounter at each centre. In this scenario, youth would be transferred to MYC and sick inmates would be transferred to AYC for monitoring.

Staff who are ill should remain home. SMT can direct ill employees home as needed.

Any staff returning from international travel are required to self-isolate for 14 days (from arrival date) and should not report for work during this time.

Work from home options should be explored.

Use of leave banks is flexible including advance of 20/21 annuals. Suspend all time limits for stat and OT banks.

For PT staff who are required to self-isolate, remove all shifts in the affected pay period and mark the staff off sick for the full PP, which would allow the staff to receive SL pro-rated against their hours averaged over the previous 8-week period.

Sick notes will not be required for the interim. Statutory declarations will be required, based on staff and SMT signature only.

Intermittent sentences are suspended until further notice. These dispositions should be end dated as they reach the ERD.

Division is currently exploring the authorization of UTAs for sentenced inmates with 7 days or less remaining before their scheduled ERD. To be reviewed on Monday, March 23.

The HSC has designed entry points and screening for all incoming patients. Additional information from other hospitals and PX3 are pending.

March 23 update.

The next conference call is scheduled for the usual time on Wednesday March 25. Attached are updated operations and FAQ documents that will be added to the website shortly. Updates are highlighted in yellow and include:

- Contact information for staff who need assistance with childcare.
- Reference to the new isolation and PPE protocols, which was just distributed globally.
- Clarification of the gymnasium restriction (exceptions for equipment in dorm spaces).
- FAQ includes more specific language about what happens if a positive COVID case is identified in the workplace.

We are in the process of reviewing release protocols for isolated inmates and we hope to have something drafted by tomorrow. The video presentation by Dr. Atwal remains on the 26 at this time, but we are trying to post this on the website as well. Some modifications were made to the website to assist staff in finding the materials.

General	Direct staff to consult Health Links, the self assessment, or a medical professional about whether they should self-isolate/monitor, or if they believe they were exposed. Avoid giving medical advice.
	PHIA still applies and it is important that we protect personal information during this process. Any notifications about possible exposure will be managed by health authorities.
	Expect supply chains to be disrupted in the coming weeks. All centres have rationing plans to prolong their supplies as much as possible. Alternate suppliers are engaged with the department.
Isolation	<i>Through your health services departments</i> , continue to identify and isolate inmates with flu symptoms as much as possible. Masking of ill inmates is advised.
	Custody centres have identified isolation space or these are currently in use. Anticipate greater demand for isolation over time.
Distancing & Movement	Volunteer access for contact visits with inmates/young persons are suspended.
	All contact visiting is suspended, with the exception of legal services. LVI and phone services should be encouraged as much as possible.
	Contractor access should continue, based on screening signage.
	All staff training events are suspended.
	Central training classes are suspended and trainers will be redeployed. Recruitment interviews are suspended.
	Cancel all non-essential escorts.

	<p>Gymnasium access is suspended for all inmates/residents. Fresh air exercise only. Numbers of inmates/residents accessing fresh air at one time to be determined by the local centre, based on space and distancing considerations. This restriction does not apply to exercise equipment installed in dormitory areas or living units.</p>
	<p>Inmate programs are suspended effective Wednesday, March 18. Access to recreation will continue, but group size should be minimized and other services should be individualized as much as possible.</p>
Admissions	<p>Prisoners who have travelled internationally within the last 14 days and have flu like symptoms will not be admitted without medical clearance (i.e., no COVID-19 present).</p>
Communications	<p>Regular updates are being forwarded to the MGEU.</p> <p>Ensure that hygiene and cough/sneezing etiquette information is posted in all areas.</p> <p>Phone system message regarding proper hygiene is in process. It is important that you make soap products available to your custody population.</p> <p>Expansion of free calling is being provided to all inmates in Manitoba. This includes 2 additional free calls (10 min each) = 5 free calls for remanded inmates and youth, and 2 free calls for the sentenced population. Installation of new equipment is not possible at this time, Canada wide.</p>
External Agencies & Jurisdictions	<p>Division is monitoring the response of other jurisdictions on a daily basis.</p> <p>Canada Post reports business as usual and no increased risk associated with mail handling.</p>
Cleaning/Supplies	<p>Regular cleaning with detergents remains an effective tool. Sanitizing may also be done with regular bleach diluted in water (1:10). Specialized products are not required.</p> <p>Fit testing equipment is not available or advised at this time. Regardless, mask usage is most effective for those who are presenting symptoms.</p> <p>Continue with aggressive cleaning schedules in all areas. This should include non-contact visiting space and escort vehicles. Hire additional trusties as required.</p> <p>A shortage of protective gear is being reported across all sectors and it is unlikely that we will be able to easily replenish existing supplies. Please manage your supply of masks/gloves carefully.</p>

	<p><u>Escort Vehicle Cleaning Procedure:</u> PTCU (Prisoner Transport Containment Unit) – Completed after each escort.</p> <ul style="list-style-type: none"> • Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended). • Let the spray sit for ten minutes then wipe down. • Sweep out the interior. <p>Officer seating area – Completed at the end of shift.</p> <ul style="list-style-type: none"> • Spray all non-porous/hard surfaces with a disinfectant spray. Let the spray sit for ten minutes then wipe down. • Sweep out interior. • Remove all garbage. <p>Several centres have purchased infrared thermometers and all centres are encouraged to obtain these while they are still available. These devices can be used by anyone in accordance with the manufacturer’s instructions for identifying cases requiring medical assessment and persons accessing the centre.</p> <p>Disinfectant foggers have been ordered from Environize and supplies will be shipped to larger custody centres in the coming week, together with operational guidelines.</p> <p>Trusty pay for pandemic cleaners may be increased or can begin at the middle increment.</p>
Future Measures	<p>It is likely that the suspension of activities and services in the community, combined with self-isolation, will affect our ability to fully staff our centres. If this occurs, unit lock-downs, closures, inmate transfers, and static security models may be deployed.</p> <p>Contract nursing resources are being explored.</p> <p>UTAs are being explored for different segments of the sentenced population.</p> <p>AYC is tentatively designated as an isolation zone, depending on the number of cases we encounter at each centre. In this scenario, youth would be transferred to MYC and sick inmates would be transferred to AYC for monitoring.</p>
Staff	<p>Staff who are ill should remain home. SMT can direct ill employees home as needed.</p> <p>Any staff returning from international travel are required to self-isolate for 14 days (from arrival date) and should not report for work during this time.</p> <p>Work from home options are being explored and VPN access is being expanded for administration personnel, but work from home options are subject to operational review and Superintendent authorization.</p> <p>Use of leave banks is flexible including advance of 20/21 annuals. Suspend all time limits for stat and OT banks. Annuals will be recredited as requested, if a staff member is required to isolate while on vacation. This time may be carried over if there is no opportunity to use this time in this fiscal year.</p>

	<p>For PT staff who are required to self-isolate, remove all shifts in the affected pay period and mark the staff off sick for the full PP, which would allow the staff to receive SL pro-rated against their hours averaged over the previous 8-week period.</p> <p>Corrections staff who need childcare can contact 204-945-0776 or 1-888-213-4754. Or email cdcinfo@gov.mb.ca.</p> <p>Sick notes will not be required for the interim. Statutory declarations will be required, based on staff and SMT signature only.</p>
UTA (Emergency Provisions)	<p>Intermittent sentences are suspended until further notice. These dispositions should be end dated as they reach the ERD.</p> <p>UTAs are authorized for sentenced adult inmates with 14 days or less remaining before their scheduled ERD. 23(1)(a) Expanded UTA provisions are being explored for the female population and release of OC youth is underway, subject to stable residence.</p>
Hospital access (escorts)	<p>The HSC has designed entry points and screening for all incoming patients. Additional information from other hospitals and PX3 are pending.</p>
Handling Conditions and PPE Use	<p>See Isolation Protocols and PPE Use document in the COVID-19 folder.</p>

Frequently Asked Questions (FAQ) – March 23

The complexity of the COVID-19 pandemic and its effect on individuals, communities, and workplaces cannot be understated. Information is evolving rapidly, and the Manitoba Government is receiving advice from the Chief Provincial Public Health Officer at the same time as Manitobans. This means we are working around the clock with a dedicated team to assess new information, interpret health advice, assess measures that protect the health and safety of employees, and plan for increased disruptions to the work of the public service.

There are many questions that we are still working to answer. If you do not see the answer to your question here, please communicate with your supervisor/manager. New information will be added as this becomes available. Policies and guidelines for public servants will evolve as the situation changes. It is up to everyone to stay informed and play their part in preventing the spread of COVID-19.

Where can I get more information about COVID-19?

COVID-19 information is located in two key places:

- The [Manitoba Government COVID-19 website](#) provides up-to-date, evidence-based advice that all Manitobans should follow.
- Messages, policies, tools, and guidelines for public servants are located on the [MBGPS COVID-19 website](#).

Will the Manitoba Government continue to provide public services as usual?

The Manitoba Government has an obligation to provide essential services to Manitobans, and will continue to provide public services based on the advice provided by the Chief Provincial Public Health Officer.

The health and safety of our employees is a priority that is considered in all of our business continuity planning and decision-making. Depending on the evolution of the COVID-19 situation, decisions may be made about *which* public services are critical for Manitobans as well as the level of public services that would be delivered.

We know that this situation is causing staff concern about potential health risks. Our health care system is working hard and is well prepared to manage this situation. We are actively working with partners in health care at the municipal, provincial and federal levels to monitor, detect and contain this evolving issue in the province.

We will continue to monitor developments on COVID-19 and take the advice provided by Manitoba Health Seniors and Active Living, Chief Provincial Public Health Officer. We will keep employees informed of any new developments related to their work. If you have questions about how the advice provided to Manitobans relates to your work, please speak with your supervisor.

What is the Manitoba Government doing to protect its employees from COVID-19?

The health and safety of our employees is a priority for the Manitoba government.

In addition to implementing [social distancing measures](#) and recommending proper cough etiquette and hand hygiene, other measures are being taken to protect employees and the public from COVID-19.

Building managers/landlords are posting signage in the workplace, encouraging proper cough etiquette and hand hygiene to ensure staff and clients are aware of these important safety steps. Posters are available in multiple languages at: www.gov.mb.ca/health/coronavirus/providers.html

Can I work from home?

The Manitoba government continues to deliver service to Manitobans. If you are healthy and not subject to self-isolation, you should continue to come to work unless otherwise directed.

We know not all jobs in government can reasonably be done from home. Minimum service levels are being considered as part of business-continuity planning. If you have ideas about which services could be delivered in alternate ways, please share those ideas with your supervisor.

Departments will support working from home options if it is needed and possible to do so. Please talk to your supervisor if you want to discuss the possibility of working from home and whether that can be accommodated.

I unexpectedly have no one to care for my children during the day, what do I do?

Many families are in this situation as our school system has taken appropriate steps to reduce the spread of COVID-19.

If you have already considered your options for alternate arrangements and need to remain home, you should discuss working from home with your supervisor. If that is not an option, employees can access any available Family Related Leave,

vacation, or accrued overtime credits. Employees may also have the option of making up all or part of the time. All of these options should be discussed with your supervisor.

On Friday March 20, the Provincial Government announced that child care would be made available for Essential Workers during this time of the pandemic, which includes all corrections staff who are doing such incredible work during these very difficult circumstances. Those staff who need child-care options should call 204-945-0776 or (toll-free) 1-888-213-4754, or e-mail cdcinfo@gov.mb.ca.

We know this will be a stressful time for many people and we will be as flexible as possible in helping employees.

I was scheduled to take vacation before the end of March, but I have cancelled my trip. Can I carry over my vacation?

In light of current travel-related recommendations, many vacations are being cancelled. Unless your vacation approval is rescinded for operational reasons, current approvals remain in place. If you think it would be operationally useful for you to delay your vacation, you are encouraged to discuss your situation with your supervisor. The Manitoba Government has existing processes in place to approve vacation carry-over, and these processes would continue to be used in the current situation.

I am concerned that by travelling to work on public transit, I may contract COVID-19. Do I have to report to work?

Currently, there is no information to suggest that taking public transit in Manitoba poses any increased risk for acquiring COVID-19.

The City of Winnipeg is reporting the measures Winnipeg Transit is undertaking to minimize the risk of using the public transportation system. For up-to-date information on Winnipeg Transit and other Winnipeg services, visit <https://www.winnipeg.ca/emergweb/covid-19/default>.

The Manitoba Government will continue to reassess its advice to employees as the situation evolves and new recommendations are provided by the Chief Provincial Public Health Officer.

Should I come to work if I am sick, or based on recent travel, have been to a location where self-isolation upon return is recommended? Or, what if someone in my home is recommended to self-isolate?

If you are sick, you should stay home. If someone in your home has been asked to self-isolate, please follow the advice provided on the [Manitoba Government COVID-19 website](#).

Staff need to make choices that are right for them, their families and their co-workers. If you feel that you are getting a cold or the flu, follow the advice on the website, which includes calling Health Links at 204-788-8200 or toll-free 1-888-315-9257 for advice on when to visit a medical facility.

Staff returning from international travel are required to self-isolate for 14 days (from the arrival date) and should not report for work during this time.

Even if you are confident that you have not been exposed to the Coronavirus, if you are coughing, have a runny nose or are otherwise exhibiting any symptoms that are consistent with the flu, it is important that you consider the potential concern that this may cause your co-workers and you are encouraged to stay home until such time as your symptoms have resolved.

Do I need to provide a doctor's note if I am away?

While the province does, under normal circumstances, have the ability to request a sick note when an employee is away ill, we understand that COVID-19 is putting additional pressure on our health system. In order to best support our employee's health, and not put unnecessary strain on the health system, medical notes will not be required. Staff in our custody centres are required to provide a statutory declaration – staff and senior manager signatures are required.

However, there may be situations where a medical note related to an absence or a return to work is necessary. In these cases, managers should contact their Human Resource Consultant before requesting documentation from the employee. The collection of personal information related to illness may be necessary for the employer to manage its workforce and to contain any potential spread of an infection within the Manitoba Government, and will be done in accordance with the Freedom of Information and Protection of Privacy Act and the Personal Health Information Act.

If I am sick, or based on medical advice am required to self-isolate for 14 days, will I be paid my normal salary?

If you are not able to come to work because you are sick or advised to self-isolate, you may be able to use sick leave or other paid leave credits such as vacation or accrued overtime.

If you are required to self-isolate, consideration will be given, based on your role, to establishing a working from home arrangement. If you are unable to work from

home or have no paid leave credits accrued, you should speak with your manager about options to make up the time.

We know this is an unprecedented circumstance. We will support our employees to be healthy, and minimize any negative impacts. We will be as flexible as we can.

For part-time staff who are required to self-isolate, all shifts in the affected pay period will be marked off as 'sick', which would allow you to receive SL pro-rated against your hours averaged over the previous 8-week period.

Do I need to advise the employer if I have been directed to self-isolate or if I have been diagnosed with COVID-19?

No. As the employer, we need to be advised that you will be off sick and the approximate duration of the absence so that we can ensure that operational needs are met. If you wish to advise of the Coronavirus connection, that is your choice.

What do I do if a co-worker appears ill at work and this is causing me concern?

Respectfully and appropriately advise your co-worker of your concern. If you are the sick worker and your co-worker approaches you, attempt to understand their position and do not argue about the situation. Thank them for their concern and speak to your Supervisor or Manager.

If you bring this concern to your apparently sick co-worker and they do not appear to do anything, speak to your supervisor or manager who assess the situation and speak with the sick employee.

A supervisor or manager will not compel you to leave sick, but may bring the matter to a Senior Manager for review. A senior manager has the authority to put staff off sick, if this is necessary.

What would happen if an employee in my workplace is diagnosed with COVID-19 or is self-isolating?

If there is a COVID-19 laboratory diagnosis in my workplace, a public health investigation is automatically triggered. Public Health notifies close contacts of laboratory-confirmed positive COVID-19 cases. Anyone at risk of contracting the virus from a colleague will be notified by Public Health.

Otherwise, each employees' personal health information is theirs to manage and employees are not required to provide the employer with a health diagnosis and the employer has a responsibility to safeguard personal health information. Personal health information will not be shared with other employees.

Will employees be provided medical masks, gloves, and hand sanitizers?

Employees whose work or job duties may put them at increased risk, such as workers in residential care facilities, correctional facilities, group homes and transportation in health care settings, are advised to take normal precautions and follow the relevant [Infection Prevention and Control Guidelines](#) provided by Manitoba Health, Seniors and Active Living.

Most employees are not required to wear personal protective equipment (PPE). Your manager will determine the need for PPE based on the circumstances of each workplace and the nature of the services provided.

Public Health officials are not recommending the use of masks in public places, as there is no evidence that wearing masks significantly reduces the risk of getting the virus.

Good hand hygiene is known to provide significant protection from viral respiratory illnesses. To reduce exposure to and transmission of a range of illnesses, including COVID-19, remember to:

- wash your hands often with soap and water or alcohol-based hand sanitizer
- sneeze and cough into your sleeve
- avoid touching your eyes, nose or mouth
- avoid contact with people who are sick
- keep your own workstation clean
- practice social distancing
- stay at home if you are sick

What do I do if I believe my workplace is unsafe?

You should immediately speak with your supervisor to explain the situation. In some cases, employees may express their concern by refusing either to come into work or by refusing certain work assignments.

The Workplace Safety and Health Act gives employees the right to refuse to work or do particular work at a workplace if they believe on reasonable grounds that the work constitutes a danger to their safety or health. This right is outlined in

most collective agreements. The work refusal process that may result from COVID-19 concerns is no different than it would be in any other situations.

Supervisors should contact their human resource consultant immediately should a refusal to work situation occur so that we can help resolve the issue and seek alternative solutions if needed.

For more information on Workplace Safety and Health expectations, please visit www.safemanitoba.com, or contact the Workplace Safety and Health Division's main switchboard at: (204)945-3446 or toll-free in Manitoba at 1-866-888-8186.

How do managers/supervisors address anxiety that some employees may be experiencing?

The risks posed by COVID-19 to Manitobans remain low at this time. However given all of the measures being taken, and in circumstances such as these, it is natural to experience anxiety.

If you feel anxious, please speak to your supervisor, who can advise you on what is being done to keep you safe, and also how to access services such as the Employee Assistance Program.

To reduce exposure to and transmission of a range of illnesses, including coronaviruses, remember to:

- wash your hands often with soap and water
- sneeze and cough into your sleeve
- avoid touching your eyes, nose or mouth
- keep your own workstation clean
- practice the principles of social distancing
- avoid contact with people who are sick
- stay home if you are sick

What if I take sick leave and this pushes me over the institutional sick leave average?

Sick leave used in association with the Coronavirus outbreak will not be considered in relation to the attendance management process. It is the employee's responsibility to ensure that this Coronavirus information is relayed to the employer so that the time can be administered appropriately.

What happens if I don't have enough paid sick leave to cover my absence?

If you are in a position where you need to be off work sick but don't have sufficient sick leave to cover the absence, please advise your Manager and/or the Deputy Superintendent. We will work with staff to use of other leave banks, including next year's accrued vacation if necessary. Time limits for stat time and OT are temporarily suspended.

If staff have no leave available to them to cover an absence, Employment Insurance is also an option and there have been special arrangements made as noted on the [EI website](#) that waives the waiting period for staff off due to Coronavirus.

Admission Process and Isolation – March 31 (Effective April 2)

Effective Thursday, April 2, all new admissions (adult/youth, male/female) in the province will be processed through the Winnipeg Remand Centre (WRC), where they will be isolated for 14 days, unless:

- The inmate/resident is released from custody
- The inmate/resident becomes symptomatic while in isolation and isolation is extended

Admission

Admission to the WRC will require a remand warrant, disposition, committal, or other court ordered detention document(s). 23(1)(a)

Male federal parole violators will not be admitted to the WRC and will be diverted to SMI. Female parole violators will be admitted as normal.

The CBSA is reviewing all detainee admissions and will ensure that only essential cases are admitted to the WRC.

Admitting centres will allow admissions to continue as normal from midnight-07:00 on April 2 to allow for the transition.

Isolation

Inmates/residents who become symptomatic at other custody centres will remain in that centre and be isolated for 14 days.

All isolated inmates/residents will receive a minimum of 30 minutes out of their cell per day.

Inmates/residents at the WRC who become symptomatic while in isolation will be isolated for 14 days from the onset of symptoms.

23(1)(a)

If two inmates/residents occupy an isolation cell and one becomes symptomatic, they will be separated and the asymptomatic inmate/resident will be isolated for another 14 days.

Trusty activity at the WRC will be limited to cleaning and laundry services.

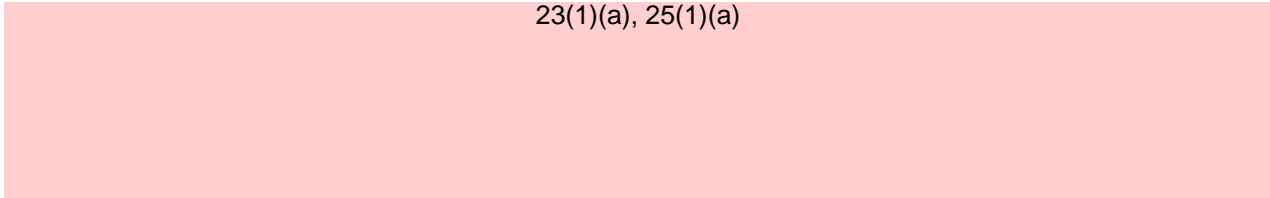

[Isolation Protocols and PPE Use](#) continues to apply.

Post-Isolation

After 14 days in isolation, and if asymptomatic, inmates will be transferred to another provincial custody centres, based on place of residence, court location, and security needs. A process will be developed to ensure the transfer of isolated inmates out of the WRC immediately after isolation.

It is expected that custody centres will become more restrictive due to the dispersal of inmate profiles, e.g. gang members, separations, etc.

23(1)(a), 25(1)(a)

March 31st, Update

Attached is the updated Pandemic Operations summary (changes in yellow), this includes:

- Suspension of all personal visits for inmates/residents. However, kiosk access for the public will be maintained.
- Effective April 2, all new admissions will be processed through the WRC. The *Admission Process and Isolation* protocol is attached for reference.
- HCC has produced several re-usable mask prototypes that can be washed. These would be used for asymptomatic inmates in isolation at the WRC after April 2. These are being reviewed.
- The *Isolation and PPE Use* is attached again for reference. It is critical that PPE use in our centres follow these guidelines.

We will be having our regular conference call on Wednesday and another is scheduled for **Friday at 08:30**. The attached documents will be updated or added to the website later today.

General	Direct staff to consult Health Links, the self assessment, or a medical professional about whether they should self-isolate/monitor, or if they believe they were exposed. Avoid giving medical advice.
	PHIA still applies and it is important that we protect personal information during this process. Any notifications about possible exposure will be managed by health authorities.
	Expect supply chains to be disrupted in the coming weeks. All centres have rationing plans to prolong their supplies as much as possible. Alternate suppliers are engaged with the department.

Isolation	<i>Through your health services departments</i> , continue to identify and isolate inmates with flu symptoms as much as possible. Masking of ill inmates is required if uncontained (outside of cell).
	Testing for COVID-19 will escalate for inmates in isolation. Inmates with a negative test and no flu symptoms will be released from isolation.
	Centres are purchasing leisure products for isolated and other spaces in the centres, including games, magazines, etc. Electronic gaming products are being researched. Tray portions to increase in all centres.
	Custody centres have identified isolation space or these are currently in use. Anticipate greater demand for isolation over time.

Distancing & Movement	Volunteer access for contact visits with inmates/young persons are suspended.
	All personal visits for inmates/residents are suspended. Legal services are encouraged to use LVI and phone services as much as possible.
	Kiosk access for the public will be maintained.
	Contractor access should continue, based on screening signage.
	All staff training events are suspended.
	Central training classes are suspended and trainers will be redeployed. Recruitment interviews are suspended.
	Cancel all non-essential escorts.
	Gymnasium access is suspended for all inmates/residents. Fresh air exercise only. Numbers of inmates/residents accessing fresh air at one time to be determined by the local centre, based on space and distancing considerations. This restriction does not apply to exercise equipment installed in dormitory areas or living units.
Inmate programs are suspended.	

Admissions	Effective April 2, all new admissions will be processed through the WRC and isolated for 14 days. No direct lock-ups or non-criminal detentions will be admitted to provincial custody for the interim.
-------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Communications	Regular updates are being forwarded to the MGEU.
	Ensure that hygiene and cough/sneezing etiquette information is posted in all areas.
	Phone system message regarding proper hygiene is in process. It is important that you make soap products available to your custody population.
	Expansion of free calling is being provided to all inmates in Manitoba. This includes 2 additional free calls (10 min each) = 5 free calls for remanded inmates and youth, and 2 free calls for the sentenced population. Installation of new equipment is not possible at this time, Canada wide.
	Bulk call purchases will be implemented by Synergy in MB, which would allow inmates to purchase large volumes of calls and reduced rates, if desired.

External Agencies & Jurisdictions	Division is monitoring the response of other jurisdictions on a daily basis.
	Canada Post reports business as usual and no increased risk associated with mail handling.

Cleaning/Supplies	Regular cleaning with detergents remains an effective tool. Sanitizing may also be done with regular bleach diluted in water (1:10). Specialized products are not required.
	Fit testing equipment is not available or advised at this time for non-medical personnel. Mask usage is most effective for those who are presenting symptoms.

	<p>Continue with aggressive cleaning schedules in all areas. This should include non-contact visiting space and escort vehicles. Hire additional trusties as required.</p> <p>A shortage of protective gear is being reported across all sectors and it is unlikely that we will be able to easily replenish existing supplies. Please manage your supply of masks/gloves carefully.</p> <p>HCC is developing a prototype mask for inmate use, which would be washable. Once available, these may be used for asymptomatic inmates in isolation.</p> <p><u>Escort Vehicle Cleaning Procedure:</u> PTCU (Prisoner Transport Containment Unit) – Completed after each escort. <ul style="list-style-type: none"> • Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended). • Let the spray sit for ten minutes then wipe down. • Sweep out the interior. Officer seating area – Completed at the end of shift. <ul style="list-style-type: none"> • Spray all non-porous/hard surfaces with a disinfectant spray. Let the spray sit for ten minutes then wipe down. • Sweep out interior. • Remove all garbage. </p> <p>Several centres have purchased infrared thermometers and all centres are encouraged to obtain these while they are still available. These devices can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and persons accessing the centre.</p> <p>Disinfectant foggers have been ordered from Environize and supplies are being shipped to custody centres. An orientation session was completed and instructions were forwarded to the centres. It is expected that all centres will have the supplies they need this week.</p> <p>Trusty pay for pandemic cleaners may be increased or can begin at the middle increment.</p>
--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Future Measures	It is likely that the suspension of activities and services in the community, combined with self-isolation, will affect our ability to fully staff our centres. If this occurs, unit lock-downs, closures, inmate transfers, and static security models may be deployed.
	Contract nursing resources are being explored.
	UTAs are being explored for different segments of the sentenced population.
	AYC is tentatively designated as an isolation zone, depending on the number of cases we encounter at each centre. In this scenario, youth would be transferred to MYC and sick inmates would be transferred to AYC for monitoring.

Staff	SMT will direct ill employees home.
--------------	-------------------------------------

	<p>Public health officials are expanding testing criteria to include the following groups of people at risk of contracting or spreading COVID-19 <u>and</u> are showing respiratory symptoms. This includes health care workers and those who live and work in group settings, including correctional centres.</p>
	<p>Use of leave banks is flexible including advance of 20/21 annuals. Suspend all time limits for stat and OT banks. Annuals will be recredited as requested, if a staff member is required to isolate while on vacation. This time may be carried over if there is no opportunity to use this time in this fiscal year.</p>
	<p>For PT staff who are required to self-isolate, remove all shifts in the affected pay period and mark the staff off sick for the full PP, which would allow the staff to receive SL pro-rated against their hours averaged over the previous 8-week period.</p>
	<p>Corrections staff who need childcare can contact 204-945-0776 or 1-888-213-4754. Or email cdcinfo@gov.mb.ca.</p>
	<p>Sick notes will not be required for the interim. Statutory declarations will be required, based on staff and SMT signature only.</p>
<p>UTA (Emergency Provisions)</p>	<p>Intermittent sentences are suspended until further notice. These dispositions should be end dated as they reach the ERD.</p>
	<p>UTAs are authorized for sentenced adult inmates with 14 days or less remaining before their scheduled ERD. 23(1)(a) Expanded UTA provisions are being explored for the female population and release of OC youth is underway, subject to stable residence.</p>
<p>Hospital access (escorts)</p>	<p>The HSC has designed entry points and screening for all incoming patients. Additional information from other hospitals and PX3 are pending.</p>

Pandemic Operations – April 22

I. General

For more information about COVID-19, visit the [Manitoba COVID-19](#) website.

For health advice or guidance about whether you should self-isolate, staff should consult Health Links (204-788-8200, or 1-888-315-9257), the [Manitoba COVID-19](#) website, or a health professional.

Ensure that hygiene and cough/sneezing etiquette information is posted in all areas. Hygiene supplies should be available to the inmate/YP population, based on current supply levels.

Practice good prevention:

- wash your hands often with soap and water or alcohol-based hand sanitizer
- sneeze and cough into your sleeve
- avoid touching your eyes, nose or mouth
- avoid contact with people who are sick
- keep your own workstation clean
- practice social distancing
- **stay at home if you are sick**

II. Social Distancing

Operationally, centres will reduce movement and direct contact as much as possible while maintaining essential services. This applies to inmates/residents and staff.

- Stage or reduce movement through dining halls, corridors, and other common spaces.
- Implement rotating break schedules in larger units to limit the number of inmates/residents sharing common space.
- Maintain distancing during direct supervision and searching (see below).
- Reduce dormitory counts as much as possible.

III. Cleaning and Supplies

Supply chains are disrupted and all custody centres have rationing plans.

Regular cleaning with detergents is an effective tool for prevent the spread of the virus and all centres have implemented aggressive cleaning schedules. Disinfecting fogging equipment was

supplied to all centres and is effective in treating large and high traffic areas, but they can also be integrated into regular cleaning schedules. Regular bleach can be diluted in water (1:10) and used as a disinfectant.

Centres can hire additional cleaning trustees as needed. Pay for cleaners may be increased or can begin at the middle increment.

Vehicle cleaning:

- Clean PTCUs after each escort and the officer cab (seating area) at the end of every shift:
 - Sweep out the interior and remove garbage.
 - Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended).
 - Target the steering wheel, handles, seat belt clasp, and any surface that is often touched.
 - Let the spray sit for ten minutes then wipe down.

IV. Programs, Services, Training

The following is suspended:

- Gymnasium access, unless equipment is installed in dormitory settings. Exercise is restricted to ‘fresh air’ access, but the number of inmates/YPs may be limited to ensure distancing.
- All non-essential escorts
- Central training classes
- Staff training events, including emergency response teams
- Personal visits
- Inmate/YP programs and volunteer access

Access for legal services and justice personnel may continue (except WRC), but these contacts should occur through LVI and phone services as much as possible.

Individual (one on one) case management, teacher, counseling, and chaplain meetings can continue if social distancing can be maintained – 6ft apart.

Contractors and maintenance personnel continue to have access to deliver essential services.

Centres are purchasing leisure products for isolated and other units as conditions become more restrictive. This includes games, magazines, movies, art supplies, etc. Several handheld electronic gaming devices were purchased and are being piloted at the WRC.

Where possible, food services will be enhanced with larger portions. Canteen limits may also be expanded at the Superintendent's discretion.

Two additional free personal calls are being provided to all inmates/YPs in custody. Bulk call purchases is also available, allowing users to purchase large volumes of personal calling at reduced rates. Public access to kiosks will be maintained.

V. **Leave Management**

Use of leave banks is flexible at this time and all time limits for stat and OT banks is suspended. Annuals may be recredited if a staff member is required to isolate using sick leave, while on vacation.

For PT staff who are required to self-isolate, timekeepers/schedulers should remove all shifts in the affected pay period and mark the staff off 'sick' for the full pay period. This allows the staff to receive pro-rated sick leave based on the average hours worked during the previous 8 week period.

Corrections staff are declared as essential workers. Those who need childcare can contact 204-945-0776, 1-888-213-4754, or email cdcinfo@gov.mb.ca.

Sick notes will not be required for the interim. Statutory declarations will be required, needing staff and senior manager signature only.

Sick leave used in association with the Coronavirus outbreak will not be considered in relation to the attendance management process. It is the employee's responsibility to ensure that this Coronavirus information is relayed to the employer so that the time can be administered appropriately.

If you are in a position where you need to be off work sick but don't have sufficient sick leave to cover the absence, please advise your Manager and/or the Deputy Superintendent. We will work with staff to use of other leave banks. Time limits for stat time and OT are temporarily suspended.

VI. **Testing**

Public Health has expanded testing criteria to include people at risk of contracting or spreading COVID-19 and are showing respiratory symptoms. This includes health care workers, and those who live and work in group settings, including correctional centres.

Corrections staff who are self-isolating and have flu like symptoms should contact Health Links and inform them that they work in a Correctional Facility. Staff should follow the advise of a community health professional about returning to work.

VII. Hospital Escorts

The Health Science Centre and other hospitals have designated entry points and screening for incoming patients. Escorts should consult these locations before attending regarding access procedures.

VIII. Staff Screening

Senior managers will send employees home if they report to work with flu symptoms.

The Shift Operations Manager at each centre will confirm (verbally) with every staff member coming on shift (or shortly after) that they are not exhibiting flu symptoms. This check will be documented.

The department has purchased additional infrared thermometers. These devices can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and/or for screening access to the centre.

Screening Procedure:

Before leaving home, staff should self-assess based on the following:

Do you have...

- Fever/Chills (higher than 38 degrees Celsius)
- New or increasing cough
- Shortness of breath or trouble breathing
- Sore throat or muscles
- Headache

In the last 14 days, have you:

- Returned from travel outside of MB?
- Had close contact with a confirmed case of COVID-19 while not wearing PPE or practicing social distancing?
- Had a laboratory exposure to COVID-19?
- Had close contact with someone who has flu symptoms?

If you have any of the above symptoms or answered 'yes' to any question, stay home and contact Health Links.

Screening upon arrival:

- Centres will designate a staging area.
- Arrival times may be staged to ensure that staff arriving to work should remain 6ft apart prior to screening.
- In colder weather, you may need to wait until your skin temperature normalizes.
- You will be checked for fever using infrared thermometer.
- You will be asked to confirm your pre-shift self-screening results.

If you have a fever or other symptoms, you will be asked to apply a surgical mask and return home to contact Health Links (204-788-8200, or 1-888-315-9257).

IX. Health Information

If there is a COVID-19 laboratory diagnosis in your workplace, a public health investigation is automatically triggered. Public Health notifies close contacts of laboratory-confirmed positive COVID-19 cases and anyone at risk of contracting the virus will be notified by Public Health.

PHIA continues to apply even if an inmate tests positive. Any inmate who is symptomatic should be considered and treated as suspected positive. There would be no change to approach or PPE on the officer's behalf whether someone was suspected or confirmed positive. The contact protocols noted above still apply.

Otherwise, each employees' personal health information is theirs to manage and employees are not required to provide the employer with a health diagnosis and the employer has a responsibility to safeguard personal health information. Personal health information will not be shared with other employees.

X. Searches

All K9 searches are suspended, with the exception of mail screening and outdoor spaces.

If possible, fog areas to be searched before searching begins. Officers should remain 1-2 meters apart while searching open areas and only one officer at a time should be searching in cells.

XI. Court Appearances, Police Removals, and Medical Escorts

Inmates/YPs who are escorted for rural court appearances will be returned to their home centre and isolated for 14 days.

Inmates removed from custody by police agencies will be returned to their home centres and isolated for 14 days.

Inmates returning from medical escorts with corrections escorts do not need to be isolated, as they are wearing PPE and their movements in the community are supervised/monitored.

Inmates returning to the custody centre from any external escort should wash/sanitize their hands before returning to their home unit.

XII. Release Planning

Several northern communities are now self-isolating and restricting access. Release planning at each custody centre must ensure that released persons are able to return to their home communities or find alternatives. Corrections will continue to arrange transport in these cases.

Probation Officers and Cam Zacharias (RRI) are available for consultation and referrals to assist with the release process.

If these measures fail, the department will consider long term community placements, e.g. hotels.

XIII. Population Management and Isolation

A. Unescorted Temporary Absences

All intermittent sentences are suspended and UTAs are authorized in all cases.

UTAs are authorized for sentenced adult male offenders with 14 days or less remaining before their scheduled ERD and adult females with 20 days remaining. 23(1)(a)

The release of OC youth are permitted, subject to stable residence.

B. Admission Restrictions

Effective Thursday, April 2, all new admissions (adult/youth, male/female) in the province are being processed through the Winnipeg Remand Centre (WRC).

- All adult admissions will be isolated at the WRC for 14 days.
- Youth admissions will be immediately transferred to the MYC for 14 days of isolation,

after the WRC admitting process is complete.

- Isolation may be extended if the inmate/young person becomes symptomatic while in isolation, as directed by medical personnel.

Admission to the WRC will require a remand warrant, disposition, committal, or other court ordered detention document(s). All direct lock-ups and other non-criminal detentions are suspended for the interim, province wide.

Male federal parole violators will not be admitted to the WRC. Female PVs will continue to be admitted to the WRC.

CBSA is reviewing all detainee admission and will ensure that only essential cases will be admitted to the WRC.

Supplies and medical resources may be redeployed to the WRC to manage the growing isolated population.

Inmates who are admitted to the WRC on the same day can be housed in the same cell, assuming compatibility. As much as possible, isolation will also separate males/females and adults/youth by unit.

WRC Trusty activity will be limited to cleaning and laundry only.

C. Isolation in other Centres

Inmates who become symptomatic at other custody centres will remain in that centre and be isolated for 14 days from the onset of symptoms, as assessed by medical personnel.

D. Isolation Conditions

Isolated inmates will receive a minimum of 30 minutes out of their cell per day.

If two inmates occupy an isolation cell and one becomes symptomatic, they will be separated and the asymptomatic inmate would be isolated for another 14 days.

E. Post-Isolation

After 14 days in isolation at the WRC, asymptomatic inmates will be transferred to other provincial custody centres, based on place of residence, court appearance location, and security needs. A process will be developed to ensure the transfer of isolated inmates out of the WRC immediately after isolation.

It is expected that custody centres will become more restrictive due to the dispersal of inmate profiles, e.g. gang members, separations, etc.

F. Transports

Rural custody centres who provide intake services (BCC, DCC, TPCC) will assist arresting agencies and Sheriffs as much as possible by deploying escort officers and vehicles to transport prisoners to the WRC. Staff have been designated at each of these centres to coordinate these transports.

XIV. Prevention and PPE Use

* Developed in consultation with Dr. Jasdeep Atwal and Director of Health Services, Bev Reeves

A. How the Virus Spreads

Based on the information we have to date, the spread of the COVID-19 is by droplet spread only and is not airborne (does not stay in the air, ducts, vents, etc.). With droplet spread the virus *cannot* penetrate skin but can only infect someone if the virus enters through a mucous membrane (eyes, nose, and mouth). This can occur directly if the droplet enters one of these locations or indirectly (if your hand touches droplets then that same hand is used to touch your mouth, nose or eyes). Spread is reduced or eliminated by regular hygiene, cleaning, and proper application of PPE as required.

B. Principles

- Practice regular hand hygiene and coughing etiquette, cleaning, and social distancing.
- Practice hand hygiene before/after donning/doffing PPE.
- Minimize movement of staff and inmates between symptomatic, asymptomatic and non-isolation spaces.
- Once PPE is donned, avoid doffing. PPE may be doffed and changed when taking a meal break, or if wet, damaged, or soiled, but staff are advised to avoid changing PPE unnecessarily.
- Once PPE is doffed, this should be replaced by clean or new PPE, whenever possible.
- Regarding reusable masks, MB health has advised that “wearing a non-medical mask is another way of covering your mouth and nose to prevent your respiratory droplets from spreading to others or landing on surfaces. A mask can reduce the chance that others are coming into contact with your respiratory droplets”.
- Medical personnel may vary the use of PPE for specific procedures and based on a risk assessment.

C. PPE Requirements

INMATES/YPs			
Location	Reusable Masks	Surgical Masks	Surgical Mask Vinyl/nitrile/latex Gloves Coverall
Outside Cell, Asymptomatic	√		
Outside Cell, Symptomatic		√	
Community (isolation)			√
Community (non-isolation)	√		

STAFF				
Location/Area	Reusable Masks	Eye Protection glasses/eye wear	Search Gloves or Bare Hands/Hygiene*	Full PPE vinyl/nitrile/latex gloves face shield surgical mask gown/coverall
Custody Centres (all staff)	√			
Asymptomatic Isolation Units/Centres	√	√	√	
Symptomatic Isolation				√
Intake Area (isolation centre only)				√
Escorts (transporting symptomatic or new admissions)				√

* Plastic (sandwich) gloves are not to be used as COVID related PPE.

D. Managing PPE

- Search gloves must be cleaned/disinfected after each encounter (within 6ft) with an inmate/YP.
- If reusable gowns/coveralls are used, these should not leave the custody centre (laundered on site).

- Disposable gowns/coverall can be disinfected (fogged) and reused if not damaged or soiled.
- Three reusable masks to be issued to all staff. These should be retained by staff and hand washed after each shift, using warm-hot water and regular detergent, rinsed, and hung to dry (this will prolong life).
- Reusable eye protection and/or face shield will be issued to staff as needed. These should be retained and cleaned/disinfected with a mild detergent before and after shift, or if doffed for any reason.
- Inmate/YP reusable masks should be retained by the inmates/YPs for further use but will be laundered/replaced daily, or when damaged, wet, or visibly soiled.

E. Managing Isolation

- Inmates/YPs are not required to wear PPE if they are contained in a cell or they are in a cell with an open door/meal slot and are not within 6 ft. of others.
- If an inmate/YP refuses to comply with PPE requirements, they are not to be moved and the SOM/Manager is to be advised of non-compliance.
- Breaks in all isolated areas. Staff will attend the cell with sanitizer, conduct a wellness check (e.g. how are you feeling, are you having any symptoms, feeling better/worse etc.), ensure the inmate/YP dons a mask, and sanitize the inmates/YPs hands. Upon conclusion of the break or unit access, hands will be sanitized again before returning to the cell.
- Cleaning of contact surfaces in symptomatic areas is required between breaks.

F. Uniform Management

- Keep uniform items separate from regular clothing at home, including footwear.
- Staff should be changing in and out of their uniform at work.
- Clean uniforms should come to work and should be washed after each shift, using regular detergent and warmest machine temperatures recommended on the uniform label.

G. Code Response

Code responders will don full PPE.

An SOM/Manager will assess risk level before initiating physical contact with an isolated inmate/YP during a code response.

N95 masks should be worn by medical personnel only when performing specific medical (aerosol generating) procedures, which would be rare. Officers who are supervising inmates during these procedures, should wear an N95 (if available) or surgical mask. The N95 mask can be worn regardless of fit testing.

After the code clears, the area should be disinfected using one of the methods described above. Disposable gear should be placed into the garbage and placed into an exterior garbage bin.

H. Hospital and Community Escorts

An SOM/Manager will conduct a site assessment of the destination in consultation with medical personnel (if possible) to direct necessary precautions.

Pandemic Operations – April 8

I. General

For more information about COVID-19, visit the [Manitoba COVID-19](#) website.

For health advice or guidance about whether you should self-isolate, staff should consult Health Links (204-788-8200, or 1-888-315-9257), the [Manitoba COVID-19](#) website, or a health professional.

Ensure that hygiene and cough/sneezing etiquette information is posted in all areas. Hygiene supplies should be available to the inmate/YP population, based on current supply levels.

Practice good prevention:

- wash your hands often with soap and water or alcohol-based hand sanitizer
- sneeze and cough into your sleeve
- avoid touching your eyes, nose or mouth
- avoid contact with people who are sick
- keep your own workstation clean
- practice social distancing
- **stay at home if you are sick**

II. Social Distancing

Operationally, centres will reduce movement and direct contact as much as possible while maintaining essential services. This applies to inmates/residents and staff.

- Stage or reduce movement through dining halls, corridors, and other common spaces.
- Implement rotating break schedules in larger units to limit the number of inmates/residents sharing common space.
- Maintain distancing during direct supervision and searching (see below).
- Reduce dormitory counts as much as possible.

III. Cleaning and Supplies

Supply chains are disrupted and all custody centres have rationing plans.

Regular cleaning with detergents is an effective tool for prevent the spread of the virus and all centres have implemented aggressive cleaning schedules. Disinfecting fogging equipment was supplied to all centres and is effective in treating large and high traffic areas, but they can also be integrated into regular cleaning schedules. Regular bleach can be diluted in water (1:10) and used as a disinfectant.

Centres can hire additional cleaning trusties as needed. Pay for cleaners may be increased or can begin at the middle increment.

Vehicle cleaning:

- Clean PTCUs after each escort and the officer cab (seating area) at the end of every shift:
 - Sweep out the interior and remove garbage.
 - Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended).
 - Target the steering wheel, handles, seat belt clasp, and any surface that is often touched.
 - Let the spray sit for ten minutes then wipe down.

IV. Programs, Services, Training

The following is suspended:

- Gymnasium access, unless equipment is installed in dormitory settings. Exercise is restricted to ‘fresh air’ access, but the number of inmates/YPs may be limited to ensure distancing.
- All non-essential escorts
- Central training classes
- Staff training events, including emergency response teams
- Personal visits
- Inmate/YP programs and volunteer access

Access for legal services and justice personnel may continue (except WRC), but these contacts should occur through LVI and phone services as much as possible.

Individual (one on one) case management, teacher, counseling, and chaplain meetings can continue if social distancing can be maintained – 6ft apart.

Contractors and maintenance personnel continue to have access to deliver essential

services.

Centres are purchasing leisure products for isolated and other units as conditions become more restrictive. This includes games, magazines, movies, art supplies, etc. Several handheld electronic gaming devices were purchased and are being piloted at the WRC.

Where possible, food services will be enhanced with larger portions. Canteen limits may also be expanded at the Superintendent's discretion.

Two additional free personal calls are being provided to all inmates/YPs in custody. Bulk call purchases is also available, allowing users to purchase large volumes of personal calling at reduced rates. Public access to kiosks will be maintained.

V. Leave Management

Use of leave banks is flexible at this time and all time limits for stat and OT banks is suspended. Annuals may be recredited if a staff member is required to isolate using sick leave, while on vacation.

For PT staff who are required to self-isolate, timekeepers/schedulers should remove all shifts in the affected pay period and mark the staff off 'sick' for the full pay period. This allows the staff to receive pro-rated sick leave based on the average hours worked during the previous 8 week period.

Corrections staff are declared as essential workers. Those who need childcare can contact 204-945-0776, 1-888-213-4754, or email cdcinfo@gov.mb.ca.

Sick notes will not be required for the interim. Statutory declarations will be required, needing staff and senior manager signature only.

Sick leave used in association with the Coronavirus outbreak will not be considered in relation to the attendance management process. It is the employee's responsibility to ensure that this Coronavirus information is relayed to the employer so that the time can be administered appropriately.

If you are in a position where you need to be off work sick but don't have sufficient sick leave to cover the absence, please advise your Manager and/or the Deputy Superintendent. We will work with staff to use of other leave banks. Time limits for stat time and OT are temporarily suspended.

VI. Testing

Public Health has expanded testing criteria to include people at risk of contracting or spreading COVID-19 and are showing respiratory symptoms. This includes health care workers, and those who live and work in group settings, including correctional centres.

Corrections staff who are self-isolating and have flu like symptoms should contact Health Links and inform them that they work in a Correctional Facility. Staff should follow the advise of a community health professional about returning to work.

VII. Hospital Escorts

The Health Science Centre and other hospitals have designated entry points and screening for incoming patients. Escorts should consult these locations before attending regarding access procedures.

VIII. Staff Screening

Senior managers will send employees home if they report to work with flu symptoms.

The Shift Operations Manager at each centre will confirm (verbally) with every staff member coming on shift (or shortly after) that they are not exhibiting flu symptoms. This check will be documented.

The department has purchased additional infrared thermometers. These devices can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and/or for screening access to the centre.

Screening Procedure:

Before leaving home, staff should self-assess based on the following:

Do you have...

- Fever (higher than 38 degrees Celsius)
- New or chronic cough
- Shortness of breath or trouble breathing
- Sore throat
- Runny nose
- Malaise
- Headache

In the last 14 days, have you:

- Returned from travel outside of MB?
- Had close contact with a confirmed case of COVID-19 while not wearing PPE or practicing social distancing?
- Had a laboratory exposure to COVID-19?
- Had close contact with someone who has flu symptoms?

If you have any of the above symptoms or answered ‘yes’ to any question, stay home and contact Health Links.

Screening upon arrival:

- Centres will designate a staging area.
- Arrival times may be staged to ensure that staff arriving to work should remain 6ft apart prior to screening.
- You will be checked for fever using infrared thermometer.
- You will be asked to confirm your pre-shift self-screening results.

If you have a fever or other symptoms, you will be asked to apply a surgical mask and return home to contact Health Links (204-788-8200, or 1-888-315-9257).

IX. Health Information

If there is a COVID-19 laboratory diagnosis in your workplace, a public health investigation is automatically triggered. Public Health notifies close contacts of laboratory-confirmed positive COVID-19 cases and anyone at risk of contracting the virus will be notified by Public Health.

PHIA continues to apply even if an inmate tests positive. Any inmate who is symptomatic should be considered and treated as suspected positive. There would be no change to approach or PPE on the officer’s behalf whether someone was suspected or confirmed positive. The contact protocols noted above still apply.

Otherwise, each employees' personal health information is theirs to manage and employees are not required to provide the employer with a health diagnosis and the employer has a responsibility to safeguard personal health information. Personal health information will not be shared with other employees.

X. Searches

All K9 searches are suspended, with the exception of mail screening and outdoor spaces.

If possible, fog areas to be searched before searching begins. Officers should remain 1-2 meters apart while searching open areas and only one officer at a time should be searching in cells.

XI. Court Appearances, Police Removals, and Medical Escorts

Inmates/YPs who are escorted for rural court appearances will be returned to their home centre and isolated for 14 days.

Inmates removed from custody by police agencies will be returned to their home centres and isolated for 14 days.

Inmates returning from medical escorts with corrections escorts do not need to be isolated, as they are wearing PPE and their movements in the community are supervised/monitored.

XII. Release Planning

Several northern communities are now self-isolating and restricting access. Release planning at each custody centre must ensure that released persons are able to return to their home communities or find alternatives. Corrections will continue to arrange transport in these cases.

Probation Officers and Cam Zacharias (RRI) are available for consultation and referrals to assist with the release process.

If these measures fail, the department will consider long term community placements, e.g. hotels.

XIII. Population Management and Isolation

A. Unescorted Temporary Absences

All intermittent sentences are suspended and UTAs are authorized in all cases.

UTAs are authorized for sentenced adult male offenders with 14 days or less remaining before their scheduled ERD and adult females with 20 days remaining. 23(1)(a)

The release of OC youth are permitted, subject to stable residence.

B. Admission Restrictions

Effective Thursday, April 2, all new admissions (adult/youth, male/female) in the province are being processed through the Winnipeg Remand Centre (WRC), where they will be isolated for 14 days, unless:

- The inmate is released from custody
- The inmate becomes symptomatic while in isolation and isolation is extended as directed by medical personnel

Admission to the WRC will require a remand warrant, disposition, committal, or other court ordered detention document(s). All direct lock-ups and other non-criminal detentions are suspended for the interim, province wide.

Male federal parole violators will not be admitted to the WRC. Female PVs will be admitted to the WRC.

CBSA is reviewing all detainee admission and will ensure that only essential cases will be admitted to the WRC.

Supplies and medical resources may be redeployed to the WRC to manage the growing isolated population.

Inmates who are admitted to the WRC on the same day can be housed in the same cell, assuming compatibility. As much as possible, isolation will also separate males/females and adults/youth by unit.

WRC Trusty activity will be limited to cleaning and laundry only.

C. Isolation in other Centres

Inmates who become symptomatic at other custody centres will remain in that centre and be isolated for 14 days from the onset of symptoms.

D. Isolation Conditions

Isolated inmates will receive a minimum of 30 minutes out of their cell per day.

If two inmates occupy an isolation cell and one becomes symptomatic, they will be separated and the asymptomatic inmate would be isolated for another 14 days.

E. Post-Isolation

After 14 days in isolation at the WRC, asymptomatic inmates will be transferred to other provincial custody centres, based on place of residence, court appearance location, and security needs. A process will be developed to ensure the transfer of isolated inmates out of the WRC immediately after isolation.

It is expected that custody centres will become more restrictive due to the dispersal of inmate profiles, e.g. gang members, separations, etc.

F. Transports

Rural custody centres who provide intake services (BCC, DCC, TPCC) will assist arresting agencies and Sheriffs as much as possible by deploying escort officers and vehicles to transport prisoners to the WRC. Staff have been designated at each of these centres to coordinate these transports.

XIV. Prevention and PPE Use

* Developed in consultation with Dr. Jasdeep Atwal and Director of Health Services, Bev Reeves

Routine Practices, including hand hygiene, respiratory hygiene, routine cleaning and social distancing should be practiced as much as possible by all staff, always, and in all areas. No one is exempt from Routine Practices.

A. How the Virus Spreads

Based on the information we have to date, the spread of the COVID-19 is by droplet spread only and is not airborne (does not stay in the air, ducts, vents, etc.). With droplet spread the virus *cannot* penetrate skin but can only infect someone if the virus enters through a mucous membrane (eyes, nose, and mouth). This can occur directly if the droplet enters one of these locations or indirectly (if your hand touches droplets then that same hand is used to touch your mouth, nose or eyes). Spread is reduced or eliminated by Routine Practices and proper application of PPE as required.

B. Assess

Before inmate/YP interaction, a risk assessment should be done. This includes an assessment of the task/care to be performed:

- How much direct or indirect contact will occur?
- The presentation of the person, are they experiencing symptoms of respiratory illness?
- The physical state of the environment. Is the area an isolation space or, general population, etc.?

- Are there physical barriers in place which provide separation or is there the ability to distance safely?

The Risk assessment will determine what type of Personal Protective Equipment or PPE is required for both the inmates/YPs and staff. PPE requirements for inmates/YPs and PPE requirements for staff are addressed separately for clarity.

C. PPE Requirements for Inmates/YPs

- All asymptomatic inmates will be issued reusable masks to combat the spread of virus through sneezing, coughing or talking when in close (less than 6 feet) contact with others. Masks should be retained by the inmates/YPs for further use but will be laundered/replaced daily, or when damaged, wet, or visibly soiled.
- All symptomatic inmates in isolation will be issued surgical masks, as long as these are available.
- Masks will be worn at all times when uncontained (outside of a cell).
- Gloves will be issued to inmates/YPs in isolation and must be worn when outside of the cell. Plastic gloves are suitable for in-unit activities (may be adjusted to non-plastic gloves when required). Higher protection/more durable gloves will be issued for off unit activity/travel. Hand Hygiene should be encouraged both before an inmate/YP comes out of the cell and after the inmate/YP returns to their cell.
- Inmates/YPs are not required to wear PPE if they are contained in a cell or they are in a cell with an open door/meal slot and are not within 6 ft. of others.
- Inmates in isolation who are escorted outside of the centre are required to wear a mask, non-plastic gloves, and a paper suit/coveralls.

If the isolated inmate/YP is being escorted to hospital, PPE will be determined by hospital personnel.

If an inmate/YP refuses to comply with PPE requirements, they are not to be moved and the SOM/Manager is to be advised of non-compliance.

D. PPE Requirements for Staff

Appropriate use of PPE is essential for reducing spread of disease including COVID-19 and we must ensure our supply of PPE is not overused to ensure that we continue to have this resource for future.

Re-usable or surgical masks will be made available for officers.

Staff are reminded to ensure hand hygiene is practiced routinely and when moving from one area to another. Hand sanitizer or washing hands is recommended after each encounter when hands may have become contaminated.

When supervising isolated inmates/YPs during medical procedures or assessments, staff will wear gloves and surgical masks. Staff will ensure safety and may recommend gowns, eye protection, etc. as required.

Medical Staff:

- Because medical personnel are encountering and treating both symptomatic and asymptomatic inmates during a shift, consistent PPE is required.
- Medical personnel will wear a surgical mask, eye protection, gloves, and gowns/coveralls for the duration of their shift. Gowns may be removed and changed when taking a meal break.

Officers and other Corrections Staff:

- All custody centre staff will wear a mask for the duration of their shift. Masks should be changed if wet, damaged, soiled, or removed for any reason. Staff are advised to avoid changing the mask unnecessarily.
- Staff working in the isolation centre or isolation units will don eye protection for the duration of their shift. Eye protection includes personal glasses, face shield, or goggles. Eye protection must be cleaned/disinfected with a mild detergent before and after shift, or if removed for any reason.
- Staff working in the isolation centre or isolation units will don gloves in any area where there is inmate/YP movement. Gloves include leather, plastic (sandwich), or any rubber/latex/nitrile glove. Gloves must be cleaned/disinfected or changed after each encounter (within 6ft) with an inmate/YP.
- Staff working in isolation areas with symptomatic or COVID positive inmates/YPs will wear the same PPE as medical personnel (as described above).
- Practice hand hygiene before/after donning/doffing PPE.

Uniform Management:

- Keep uniform items separate from regular clothing at home, including footwear.
- Staff should be changing in and out of their uniform at work.

- Clean uniforms should come to work and should be washed after each shift, using regular detergent and warmest machine temperatures recommended on the uniform label.

E. Code Response

An SOM/Manager will assess risk level before initiating physical contact with an isolated inmate/YP during a code response.

During a code response in isolated areas, responders will wear gloves, paper suit/coverall, mask, and eye protection/shields.

N95 masks should be worn by medical personnel only when performing specific medical (aerosol generating) procedures, which would be rare. Officers who are supervising inmates during these procedures, should wear an N95 (if available) or surgical mask. The N95 mask can be worn regardless of fit testing.

After the code clears, the area should be disinfected using one of the methods described above. Disposable gear should be placed into the garbage and placed into an exterior garbage bin.

F. Hospital and Community Escorts

An SOM/Manager will conduct a site assessment of the destination in consultation with medical personnel (if possible) to direct necessary precautions.

Pandemic Operations – May 15

I. General

- For more information about COVID-19, visit the [Manitoba COVID-19](#) website.
- For health advice or guidance about whether you should self-isolate, staff should consult Health Links (204-788-8200, or 1-888-315-9257), the [Manitoba COVID-19](#) website, or a health professional.
- Ensure that hygiene and cough/sneezing etiquette information is posted in all areas. Hygiene supplies should be available to the inmate/YP population, based on current supply levels.
- Practice good prevention:
 - wash your hands often with soap and water or alcohol-based hand sanitizer
 - sneeze and cough into your sleeve
 - avoid touching your eyes, nose or mouth
 - avoid contact with people who are sick
 - keep your own workstation clean
 - practice social distancing
 - **stay at home if you are sick**

II. Social Distancing

- Centres will reduce movement and direct contact as much as possible while maintaining essential services. This applies to inmates/residents and staff.
- Stage or reduce movement through dining halls, corridors, and other common spaces.
- Implement rotating break schedules in larger units to limit the number of inmates/residents sharing common space.
- Maintain distancing during direct supervision and searching (see below).
- Reduce dormitory counts as much as possible.

III. Cleaning and Supplies

- Supply chains are disrupted and all custody centres have rationing plans.
- Regular cleaning with detergents is an effective tool for preventing the spread of the virus and all centres have implemented aggressive cleaning schedules. Disinfecting fogging equipment was supplied to all centres and is effective in treating large and high traffic areas, but they can also be integrated into regular

cleaning schedules.

- Regular bleach can be diluted in water (1:10) and used as a disinfectant.
- Centres can hire additional cleaning trustees as needed. Pay for cleaners may be increased or can begin at the middle increment.
- Clean escort vehicle PTCUs after each escort and the officer cab (seating area) at the end of every shift:
 - Sweep out the interior and remove garbage.
 - Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended).
 - Target the steering wheel, handles, seat belt clasp, and any surface that is often touched.
 - Let the spray sit for ten minutes then wipe down.

IV. Programs, Services, Training

- The following is suspended:
 - Gymnasium access, unless equipment is installed in dormitory settings. Exercise is restricted to ‘fresh air’ access, but the number of inmates/YPs may be limited to ensure distancing.
 - All non-essential escorts
 - Central training classes
 - Staff training events, including emergency response teams
 - Personal visits
 - Inmate/YP programs and volunteer access
- Access for legal services and justice personnel may continue (except WRC), but these contacts should occur through LVI and phone services as much as possible.
- Individual (one on one) case management, teacher, counseling, and chaplain meetings can continue if social distancing can be maintained – 6ft apart.
- Contractors and maintenance personnel continue to have access to deliver essential services.
- Centres are purchasing leisure products for isolated and other units as conditions become more restrictive. This includes games, magazines, movies, art supplies, etc. Several handheld electronic gaming devices were purchased and are being piloted at the WRC.
- Where possible, food services will be enhanced with larger portions. Canteen limits may also be expanded at the Superintendent’s discretion.
- Two additional free personal calls are being provided to all inmates/YPs in custody. Bulk call purchases is also available, allowing users to purchase large volumes of personal calling at reduced rates. Public access to kiosks will be maintained.

V. Leave Management

- Use of leave banks is flexible at this time and all time limits for stat and OT banks is suspended. Annuals may be recredited if a staff member is required to isolate using sick leave, while on vacation.
- For PT staff who are required to self-isolate, timekeepers/schedulers should remove all shifts in the affected pay period and mark the staff off 'sick' for the full pay period. This allows the staff to receive pro-rated sick leave based on the average hours worked during the previous 8 week period.
- Corrections staff are declared as essential workers. Those who need childcare can contact 204-945-0776, 1-888-213-4754, or email cdcinfo@gov.mb.ca.
- Sick notes will not be required for the interim. Statutory declarations will be required, needing staff and senior manager signature only.
- Sick leave used in association with the Coronavirus outbreak will not be considered in relation to the attendance management process. It is the employee's responsibility to ensure that this Coronavirus information is relayed to the employer so that the time can be administered appropriately.
- If you are in a position where you need to be off work sick but don't have sufficient sick leave to cover the absence, please advise your Manager and/or the Deputy Superintendent. We will work with staff to use of other leave banks. Time limits for stat time and OT are temporarily suspended.

VI. Testing

- Public health officials have expanded testing criteria to include all symptomatic Manitobans. Symptoms include fever, cough, runny nose and sore throat. Testing capacity has increased and the province is prepared to test anyone who has symptoms of COVID-19.
- Manitobans who are showing symptoms must still be referred for testing. For more information call Health Links-Info Santé at 204-788-8200 or (toll-free) at 1-888-315-9257.
- Correctional centre staff who have symptoms are required to isolate for 14 days from the day symptoms started, and are only permitted to return to work if they no longer have symptoms.

VII. Hospital Escorts

- The Health Science Centre and other hospitals have designated entry points and screening for incoming patients. Escorts should consult these locations before

attending regarding access procedures.

VIII. Staff Screening

- Senior managers will send employees home if they report to work with flu symptoms.
- The Shift Operations Manager at each centre will confirm (verbally) with every staff member coming on shift (or shortly after) that they are not exhibiting flu symptoms. This check will be documented.
- The department has purchased additional infrared thermometers. These devices can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and/or for screening access to the centre.

Screening Procedure:

Before leaving home, staff should self-assess based on the following:

Do you have...

- Fever/Chills (higher than 38 degrees Celsius)
- New or increasing cough
- Shortness of breath or trouble breathing
- Sore throat or muscles
- Headache

In the last 14 days, have you:

- Returned from travel outside of MB?
- Had close contact with a confirmed case of COVID-19 while not wearing PPE or practicing social distancing?
- Had a laboratory exposure to COVID-19?
- Had close contact with someone who has flu symptoms?

If you have any of the above symptoms or answered 'yes' to any question, stay home and contact Health Links.

Screening upon arrival:

- Centres will designate a staging area.
- Arrival times may be staged to ensure that staff arriving to work should remain 6ft apart prior to screening.

- In colder weather, you may need to wait until your skin temperature normalizes.
- You will be checked for fever using infrared thermometer.
- You will be asked to confirm your pre-shift self-screening results.

If you have a fever or other symptoms, you will be asked to apply a surgical mask and return home to contact Health Links (204-788-8200, or 1-888-315-9257).

IX. Health Information

- If there is a COVID-19 laboratory diagnosis in your workplace, a public health investigation is automatically triggered. Public Health notifies close contacts of laboratory-confirmed positive COVID-19 cases and anyone at risk of contracting the virus will be notified by Public Health.
- PHIA continues to apply even if an inmate tests positive. Any inmate who is symptomatic should be considered and treated as suspected positive. There would be no change to approach or PPE on the officer's behalf whether someone was suspected or confirmed positive. The contact protocols noted above still apply.
- Otherwise, each employees' personal health information is theirs to manage and employees are not required to provide the employer with a health diagnosis and the employer has a responsibility to safeguard personal health information. Personal health information will not be shared with other employees.

X. Searches

- All K9 searches are suspended, with the exception of mail screening and outdoor spaces.
- If possible, fog areas to be searched before searching begins. Officers should remain 1-2 meters apart while searching open areas and only one officer at a time should be searching in cells.

XI. Court Appearances, Police Removals, and Medical Escorts

- Inmates/YPs returning from medical escorts with corrections escorts do not need to be isolated, unless the medical escort extends overnight.
- Inmates/YPs removed from custody by police agencies will be returned to their home centres and isolated for 14 days.
- Inmates/YPs returning to the custody centre from any external escort should

wash/sanitize their hands before returning to their home unit.

- Inmates/YPs attending court outside the custody centre will be returned to their home centre and isolated for 14 days, with the following exceptions:
 - Inmates/YPs from Winnipeg area centres (WRC, WCC, HCC, AYC, MYC, MRCC) attending court in Winnipeg.
 - Inmates/YPs from BCC or AYC attending court in Brandon.
 - Inmates from DCC attending court in Dauphin.
 - Inmates from TPCC attending court in The Pas (pending confirmation).

XII. Release Planning

- Several northern communities are now self-isolating and restricting access. Release planning at each custody centre must ensure that released persons are able to return to their home communities or find alternatives. Corrections will continue to arrange transport in these cases.
- Probation Officers and Cam Zacharias (RRI) are available for consultation and referrals to assist with the release process.
- If these measures fail, the department will consider long term community placements, e.g. hotels.

XIII. Population Management and Isolation

A. Unescorted Temporary Absences

- All intermittent sentences are suspended and UTAs are authorized in all cases.
- UTAs are authorized for sentenced adult male offenders with 14 days or less remaining before their scheduled ERD and adult females with 20 days remaining. 23(1)(a)
- The release of OC youth are permitted, subject to stable residence.

B. Admission Restrictions

- Effective Thursday, April 2, all new admissions (adult/youth, male/female) in the province are being processed through the Winnipeg Remand Centre (WRC).
 - All adult admissions will be isolated at the WRC for 14 days.
 - Youth admissions will be immediately transferred to the MYC for 14 days of isolation, after the WRC admitting process is complete.

- Isolation may be extended if the inmate/YP becomes symptomatic while in isolation, as directed by medical personnel.
- Inmates/YPs must be symptom free for a minimum of 48 hours before their scheduled release from isolation.
- Admission to the WRC will require a remand warrant, disposition, committal, or other court ordered detention document(s). All direct lock-ups and other non-criminal detentions are suspended for the interim, province wide.
- Male federal parole violators will not be admitted to the WRC. Female PVs will continue to be admitted to the WRC.
- CBSA is reviewing all detainee admission and will ensure that only essential cases will be admitted to the WRC.
- Supplies and medical resources may be redeployed to the WRC to manage the growing isolated population.
- Inmates/YPs who are admitted to the WRC on the same day can be housed in the same cell, assuming compatibility. As much as possible, isolation will also separate males/females and adults/youth by unit.
- WRC Trusty activity will be limited to cleaning and laundry only.

C. Isolation in other Centres

- Inmates/YPs who become symptomatic at other custody centres will remain in that centre and be isolated for 14 days from the onset of symptoms, as assessed by medical personnel. Inmates/YPs must be symptom free for a minimum of 48 hours before their scheduled release from isolation.

D. Isolation Conditions

- Isolated inmates/YPs will receive a minimum of 30 minutes out of their cell per day.
- If two inmates/YPs occupy an isolation cell and one becomes symptomatic, they will be separated and the asymptomatic inmate/YP would be isolated for another 14 days.

E. Post-Isolation

- After 14 days in isolation at the WRC, asymptomatic inmates will be transferred to other provincial custody centres, based on place of residence, court appearance location, and security needs. A process was developed to ensure the transfer of isolated inmates out of the WRC immediately after isolation.
- It is expected that custody centres will become more restrictive due to the

dispersal of inmate profiles, e.g. gang members, separations, etc.

F. Transports

- Rural custody centres who normally provide intake services (BCC, DCC, TPCC) will assist arresting agencies and Sheriffs as much as possible by deploying escort officers and vehicles to transport prisoners to the WRC. Staff have been designated at each of these centres to coordinate these transports.

XIV. Prevention and PPE Use

* Developed in consultation with Dr. Jasdeep Atwal and Director of Health Services, Bev Reeves

A. How the Virus Spreads

- Based on the information we have to date, the spread of the COVID-19 is by droplet spread only and is not airborne (does not stay in the air, ducts, vents, etc.).
- With droplet spread the virus *cannot* penetrate skin but can only infect someone if the virus enters through a mucous membrane (eyes, nose, and mouth). This can occur directly if the droplet enters one of these locations or indirectly (if your hand touches droplets then that same hand is used to touch your mouth, nose or eyes).
- Spread is reduced or eliminated by regular hygiene, cleaning, and proper application of PPE as required.

B. Principles

- Practice regular hand hygiene and coughing etiquette, cleaning, and social distancing.
- Practice hand hygiene before/after donning/doffing PPE.
- Minimize movement of staff and inmates between symptomatic, asymptomatic and non-isolation spaces.
- Once PPE is donned, avoid doffing. PPE may be doffed and changed when taking a meal break, or if wet, damaged, or soiled, but staff are advised to avoid changing PPE unnecessarily.
- Once PPE is doffed, this should be replaced by clean or new PPE, whenever possible.
- Regarding reusable masks, MB health has advised that “wearing a non-medical mask is another way of covering your mouth and nose to prevent your respiratory droplets from spreading to others or landing on surfaces. A mask can

reduce the chance that others are coming into contact with your respiratory droplets”.

- Medical personnel may vary the use of PPE for specific procedures and based on a risk assessment.

C. PPE Requirements

INMATES/YPs			
Location	Reusable Masks	Surgical Masks	Surgical Mask Vinyl/nitrile/latex Gloves Coverall
Outside Cell, Asymptomatic	√		
Outside Cell, Symptomatic		√	
Community (isolation)			√
Community (non-isolation)	√		

STAFF				
Location/Area	Reusable Masks	Eye Protection glasses/eye wear	Search Gloves or Bare Hands/Hygiene*	Full PPE vinyl/nitrile/latex gloves face shield surgical mask gown/coverall
Custody Centres (all staff)	√			
Asymptomatic Isolation Units/Centres	√	√	√	
Symptomatic Isolation				√
Intake Area (isolation centre only)				√
Escorts (transporting symptomatic or new admissions)				√

* Plastic (sandwich) gloves are not to be used as COVID related PPE.

D. Managing PPE

- Search gloves must be cleaned/disinfected after each encounter (within 6ft) with an inmate/YP.
- If reusable gowns/coveralls are used, these should not leave the custody centre (laundered on site).
- Disposable gowns/coverall can be disinfected (fogged) and reused if not damaged or soiled.
- Three reusable masks to be issued to all staff. These should be retained by staff and hand washed after each shift, using warm-hot water and regular detergent, rinsed, and hung to dry (this will prolong life).
- Reusable eye protection and/or face shield will be issued to staff as needed. These should be retained and cleaned/disinfected with a mild detergent before and after shift, or if doffed for any reason.
- Inmate/YP reusable masks should be retained by the inmates/YPs for further use but will be laundered/replaced daily, or when damaged, wet, or visibly soiled.

E. Managing Isolation

- Inmates/YPs are not required to wear PPE if they are contained in a cell or they are in a cell with an open door/meal slot and are not within 6 ft. of others.
- If an inmate/YP refuses to comply with PPE requirements, they are not to be moved and the SOM/Manager is to be advised of non-compliance.
- Breaks in all isolated areas. Staff will attend the cell with sanitizer, conduct a wellness check (e.g. how are you feeling, are you having any symptoms, feeling better/worse etc.), ensure the inmate/YP dons a mask, and sanitize the inmates/YPs hands. Upon conclusion of the break or unit access, hands will be sanitized again before returning to the cell.
- Cleaning of contact surfaces in symptomatic areas is required between breaks.

F. Uniform Management

- Keep uniform items separate from regular clothing at home, including footwear.
- Staff should be changing in and out of their uniform at work.
- Clean uniforms should come to work and should be washed after each shift, using regular detergent and warmest machine temperatures recommended on the uniform label.

G. Code Response

- Code responders will don full PPE.
- An SOM/Manager will assess risk level before initiating physical contact with an isolated inmate/YP during a code response.
- After the code clears, the area should be disinfected using one of the methods described above. Disposable gear should be placed into the garbage and placed into an exterior garbage bin.

23(1)(a)

H. Hospital and Community Escorts

- An SOM/Manager will conduct a site assessment of the destination in consultation with medical personnel (if possible) to direct necessary precautions.

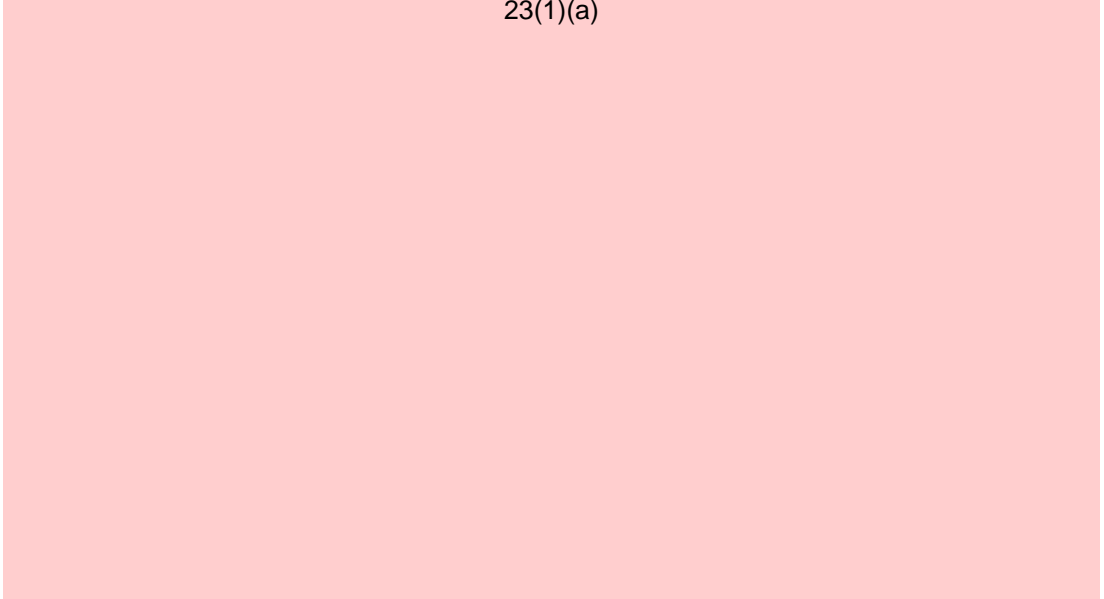

I. Supervising Medical Procedures

- N95 masks should be worn only when performing specific medical (aerosol generating) procedures, which includes dental services. Officers who are supervising inmates during these procedures, should wear an N95 (if available) or surgical mask. The N95 mask can be donned regardless of fit testing.

J. CPAP (Sleep Apnea) Machine Management

- Inmates/YPs in isolation will not be allowed to use their CPAP machines unless deemed essential by their primary physician.

23(1)(a)

Pandemic Operations – May 29

I. General

- For more information about COVID-19, visit the [Manitoba COVID-19](#) website.
- For health advice or guidance about whether you should self-isolate, staff should consult Health Links (204-788-8200, or 1-888-315-9257), the [Manitoba COVID-19](#) website, or a health professional.
- Ensure that hygiene and cough/sneezing etiquette information is posted in all areas. Hygiene supplies should be available to the inmate/YP population, based on current supply levels.
- Practice good prevention:
 - wash your hands often with soap and water or alcohol-based hand sanitizer
 - sneeze and cough into your sleeve
 - avoid touching your eyes, nose or mouth
 - avoid contact with people who are sick
 - keep your own workstation clean
 - practice social distancing
 - **stay at home if you are sick**

II. Social Distancing

- Centres will reduce movement and direct contact as much as possible while maintaining essential services. This applies to inmates/residents and staff.
- Stage or reduce movement through dining halls, corridors, and other common spaces.
- Implement rotating break schedules in larger units to limit the number of inmates/residents sharing common space.
- Maintain distancing during direct supervision and searching (see below).
- Reduce dormitory counts as much as possible.

III. Cleaning and Supplies

- Supply chains are disrupted and all custody centres have rationing plans.
- Regular cleaning with detergents is an effective tool for preventing the spread of the virus and all centres have implemented aggressive cleaning schedules. Disinfecting fogging equipment was supplied to all centres and is effective in treating large and high traffic areas, but they can also be integrated into regular

cleaning schedules.

- Regular bleach can be diluted in water (1:10) and used as a disinfectant.
- Centres can hire additional cleaning trustees as needed. Pay for cleaners may be increased or can begin at the middle increment.
- Clean escort vehicle PTCUs after each escort and the officer cab (seating area) at the end of every shift:
 - Sweep out the interior and remove garbage.
 - Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended).
 - Target the steering wheel, handles, seat belt clasp, and any surface that is often touched.
 - Let the spray sit for ten minutes then wipe down.

IV. Programs, Services, Training

- The following is suspended:
 - Gymnasium access, unless equipment is installed in dormitory settings. Exercise is restricted to ‘fresh air’ access, but the number of inmates/YPs may be limited to ensure distancing.
 - All non-essential escorts
 - Central training classes
 - Staff training events, including emergency response teams
 - Personal visits
 - Inmate/YP programs and volunteer access
- Access for legal services and justice personnel may continue (except WRC), but these contacts should occur through LVI and phone services as much as possible.
- Individual (one on one) case management, teacher, counseling, Elder, and chaplain meetings can continue if social distancing can be maintained – 6ft apart.
- Staff led spiritual care services (e.g. sharing circles, worship services, etc.) are permitted for groups of 10 or less (including leaders) if social distancing can be maintained. Meetings are restricted to occupants of the same living unit.
- Contractors and maintenance personnel continue to have access to deliver essential services.
- Centres are purchasing leisure products for isolated and other units as conditions become more restrictive. This includes games, magazines, movies, art supplies, etc. Several handheld electronic gaming devices were purchased and are being piloted at the WRC.
- Where possible, food services will be enhanced with larger portions. Canteen limits may also be expanded at the Superintendent’s discretion.
- Three additional free personal calls are being provided to all sentenced adult

inmates. Bulk call purchases are also available, allowing users to purchase large volumes of personal calling at reduced rates. Public access to kiosks will be maintained.

V. Leave Management

- Use of leave banks is flexible at this time and all time limits for stat and OT banks is suspended. Annuals may be reccredited if a staff member is required to isolate using sick leave, while on vacation.
- For PT staff who are required to self-isolate, timekeepers/schedulers should remove all shifts in the affected pay period and mark the staff off 'sick' for the full pay period. This allows the staff to receive pro-rated sick leave based on the average hours worked during the previous 8 week period.
- Corrections staff are declared as essential workers. Those who need childcare can contact 204-945-0776, 1-888-213-4754, or email cdcinfo@gov.mb.ca.
- Sick notes will not be required for the interim. Statutory declarations will be required, needing staff and senior manager signature only.
- Sick leave used in association with the Coronavirus outbreak will not be considered in relation to the attendance management process. It is the employee's responsibility to ensure that this Coronavirus information is relayed to the employer so that the time can be administered appropriately.
- If you are in a position where you need to be off work sick but don't have sufficient sick leave to cover the absence, please advise your Manager and/or the Deputy Superintendent. We will work with staff to use of other leave banks. Time limits for stat time and OT are temporarily suspended.

VI. Testing

- Testing will be offered to all new admissions to the WRC starting the week of June 1/20.
- Public health officials have expanded testing criteria to include all symptomatic Manitobans. Symptoms include fever, cough, runny nose and sore throat. Testing capacity has increased and the province is prepared to test anyone who has symptoms of COVID-19.
- Anyone with a fever, cough, sore throat, headaches, shortness of breath, runny nose, nausea, fatigue or rashes are advised to [use the province's online screening tool](#) before going directly to a testing site in their neighbourhood.
- Correctional centre staff who have symptoms are required to isolate for 14 days from the day symptoms started, and are only permitted to return to work if they no longer have symptoms.

VII. Hospital Escorts

- The Health Science Centre and other hospitals have designated entry points and screening for incoming patients. Escorts should consult these locations before attending regarding access procedures.

VIII. Staff Screening

- Senior managers will send employees home if they report to work with flu symptoms.
- The Shift Operations Manager at each centre will confirm (verbally) with every staff member coming on shift (or shortly after) that they are not exhibiting flu symptoms. This check will be documented.
- The department has purchased additional infrared thermometers. These devices can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and/or for screening access to the centre.

Screening Procedure:

Before leaving home, staff should self-assess based on the following:

Do you have...

- Fever/Chills (higher than 38 degrees Celsius)
- New or increasing cough
- Shortness of breath or trouble breathing
- Sore throat or muscles
- Headache

In the last 14 days, have you:

- Returned from travel outside of MB?
- Had close contact with a confirmed case of COVID-19 while not wearing PPE or practicing social distancing?
- Had a laboratory exposure to COVID-19?
- Had close contact with someone who has flu symptoms?

If you have any of the above symptoms or answered 'yes' to any question, stay home and contact Health Links.

Screening upon arrival:

- Centres will designate a staging area.
- Arrival times may be staged to ensure that staff arriving to work should remain 6ft apart prior to screening.
- In colder weather, you may need to wait until your skin temperature normalizes.
- You will be checked for fever using infrared thermometer.
- You will be asked to confirm your pre-shift self-screening results.

If you have a fever or other symptoms, you will be asked to apply a surgical mask and return home to contact Health Links (204-788-8200, or 1-888-315-9257).

IX. Health Information

- If there is a COVID-19 laboratory diagnosis in your workplace, a public health investigation is automatically triggered. Public Health notifies close contacts of laboratory-confirmed positive COVID-19 cases and anyone at risk of contracting the virus will be notified by Public Health.
- PHIA continues to apply even if an inmate tests positive. Any inmate who is symptomatic should be considered and treated as suspected positive. There would be no change to approach or PPE on the officer's behalf whether someone was suspected or confirmed positive. The contact protocols noted above still apply.
- Otherwise, each employees' personal health information is theirs to manage and employees are not required to provide the employer with a health diagnosis and the employer has a responsibility to safeguard personal health information. Personal health information will not be shared with other employees.

X. Searches

- All K9 searches are suspended, with the exception of mail screening and outdoor spaces.
- If possible, fog areas to be searched before searching begins. Officers should remain 1-2 meters apart while searching open areas and only one officer at a time should be searching in cells.

XI. Court Appearances, Police Removals, and Medical Escorts

- Inmates/YPs returning from medical escorts with corrections escorts do not need to be isolated, unless the medical escort extends overnight.

- Inmates/YPs removed from custody by police agencies will be returned to their home centres and isolated for 14 days.
- Inmates/YPs returning to the custody centre from any external escort should wash/sanitize their hands before returning to their home unit.
- Inmates/YPs attending court outside the custody centre will be returned to their home centre and isolated for 14 days, with the following exceptions:
 - Inmates/YPs from designated centres (WRC, BCC, WCC, HCC, AYC, MYC, MRCC) attending court in Winnipeg.
 - Inmates/YPs from BCC or AYC attending court in Brandon.
 - Inmates from DCC attending court in Dauphin.

XII. Release Planning

- Several northern communities are now self-isolating and restricting access. Release planning at each custody centre must ensure that released persons are able to return to their home communities or find alternatives. Corrections will continue to arrange transport in these cases.
- Probation Officers and Cam Zacharias (RRI) are available for consultation and referrals to assist with the release process.
- If these measures fail, the department will consider long term community placements, e.g. hotels.

XIII. Population Management and Isolation

A. Unescorted Temporary Absences

- All intermittent sentences are suspended and UTAs are authorized in all cases.
- UTAs are authorized for sentenced adult male offenders with 14 days or less remaining before their scheduled ERD and adult females with 20 days remaining. 23(1)(a)
- The release of OC youth are permitted, subject to stable residence.

B. Admission Restrictions

- Effective Thursday, April 2, all new admissions (adult/youth, male/female) in the province are being processed through the Winnipeg Remand Centre (WRC).
 - All adult admissions will be isolated at the WRC for 14 days.
 - Youth admissions will be immediately transferred to the MYC for 14

days of isolation, after the WRC admitting process is complete.

- Isolation may be extended if the inmate/YP becomes symptomatic while in isolation, as directed by medical personnel.
- Inmates/YPs must be symptom free for a minimum of 48 hours before their scheduled release from isolation.
- Admission to the WRC will require a remand warrant, disposition, committal, or other court ordered detention document(s). All direct lock-ups and other non-criminal detentions are suspended for the interim, province wide.
- Male federal parole violators will not be admitted to the WRC. Female PVs will continue to be admitted to the WRC.
- CBSA is reviewing all detainee admission and will ensure that only essential cases will be admitted to the WRC.
- Supplies and medical resources may be redeployed to the WRC to manage the growing isolated population.
- Inmates/YPs who are admitted to the WRC on the same day can be housed in the same cell, assuming compatibility. As much as possible, isolation will also separate males/females and adults/youth by unit.
- WRC Trusty activity will be limited to cleaning and laundry only.

C. Isolation in other Centres

- Inmates/YPs who become symptomatic at other custody centres will remain in that centre and be isolated for 14 days from the onset of symptoms, as assessed by medical personnel. Inmates/YPs must be symptom free for a minimum of 48 hours before their scheduled release from isolation.

D. Isolation Conditions

- Isolated inmates/YPs will receive a minimum of 30 minutes out of their cell per day.
- If two inmates/YPs occupy an isolation cell and one becomes symptomatic, they will be separated and the asymptomatic inmate/YP would be isolated for another 14 days.

E. Post-Isolation

- After 14 days in isolation at the WRC, asymptomatic inmates will be transferred to other provincial custody centres, based on place of residence, court appearance location, and security needs. A process was developed to ensure the transfer of isolated inmates out of the WRC immediately after isolation.
- It is expected that custody centres will become more restrictive due to the

dispersal of inmate profiles, e.g. gang members, separations, etc.

F. Transports

- Rural custody centres who normally provide intake services (BCC, DCC, TPCC) will assist arresting agencies and Sheriffs as much as possible by deploying escort officers and vehicles to transport prisoners to the WRC. Staff have been designated at each of these centres to coordinate these transports.

XIV. Prevention and PPE Use

* Developed in consultation with Dr. Jasdeep Atwal and Director of Health Services, Bev Reeves

A. How the Virus Spreads

- Based on the information we have to date, the spread of the COVID-19 is by droplet spread only and is not airborne (does not stay in the air, ducts, vents, etc.).
- With droplet spread the virus *cannot* penetrate skin but can only infect someone if the virus enters through a mucous membrane (eyes, nose, and mouth). This can occur directly if the droplet enters one of these locations or indirectly (if your hand touches droplets then that same hand is used to touch your mouth, nose or eyes).
- Spread is reduced or eliminated by regular hygiene, cleaning, and proper application of PPE as required.

B. Principles

- Practice regular hand hygiene and coughing etiquette, cleaning, and social distancing.
- Practice hand hygiene before/after donning/doffing PPE.
- Minimize movement of staff and inmates between symptomatic, asymptomatic and non-isolation spaces.
- Once PPE is donned, avoid doffing. PPE may be doffed and changed when taking a meal break, or if wet, damaged, or soiled, but staff are advised to avoid changing PPE unnecessarily.
- Once PPE is doffed, this should be replaced by clean or new PPE, whenever possible.
- Regarding reusable masks, MB health has advised that “wearing a non-medical mask is another way of covering your mouth and nose to prevent your respiratory droplets from spreading to others or landing on surfaces. A mask can

reduce the chance that others are coming into contact with your respiratory droplets”.

- Medical personnel may vary the use of PPE for specific procedures and based on a risk assessment.

C. PPE Requirements

INMATES/YPs			
Location	Reusable Masks	Surgical Masks	Surgical Mask Vinyl/nitrile/latex Gloves Coverall
Outside Cell, Asymptomatic	√		
Outside Cell, Symptomatic		√	
Community Escort* (from isolation)			√
Community Escort (from non-isolation)	√		

* Does not apply to transfers between centres by Corrections escorts. For transfers, use 'outside cell' precautions as noted above.

STAFF				
Location/Area	Reusable Masks	Eye Protection glasses/eye wear	Vinyl, Search, or Plastic Gloves*	Full PPE vinyl/nitrile/latex gloves face shield surgical mask gown/coverall
Custody Centres (all staff)	√			
Asymptomatic Isolation Units/Centres	√	√	Optional	
Symptomatic Isolation				√
Intake Area (isolation centre only)				√
Escorts (transporting symptomatic or new admissions)				√

* To be made available based on supply, as determined by the custody centre.

D. Managing PPE

- Search gloves must be cleaned/disinfected after each encounter (within 6ft) with an inmate/YP.
- If reusable gowns/coveralls are used, these should not leave the custody centre (laundered on site).
- Disposable gowns/coverall can be disinfected (fogged) and reused if not damaged or soiled.
- Three reusable masks to be issued to all staff. These should be retained by staff and hand washed after each shift, using warm-hot water and regular detergent, rinsed, and hung to dry (this will prolong life).
- Reusable eye protection and/or face shield will be issued to staff as needed. These should be retained and cleaned/disinfected with a mild detergent before and after shift, or if doffed for any reason.
- Inmate/YP reusable masks should be retained by the inmates/YPs for further use but will be laundered/replaced daily, or when damaged, wet, or visibly soiled.

E. Managing Isolation

- Inmates/YPs are not required to wear PPE if they are contained in a cell or they are in a cell with an open door/meal slot and are not within 6 ft. of others.
- If an inmate/YP refuses to comply with PPE requirements, they are not to be moved and the SOM/Manager is to be advised of non-compliance.
- Breaks in all isolated areas. Staff will attend the cell with sanitizer, conduct a wellness check (e.g. how are you feeling, are you having any symptoms, feeling better/worse etc.), ensure the inmate/YP dons a mask, and sanitize the inmates/YPs hands. Upon conclusion of the break or unit access, hands will be sanitized again before returning to the cell.
- Cleaning of contact surfaces in symptomatic areas is required between breaks.

F. Uniform Management

- Keep uniform items separate from regular clothing at home, including footwear.
- Staff should be changing in and out of their uniform at work.
- Clean uniforms should come to work and should be washed after each shift, using regular detergent and warmest machine temperatures recommended on the uniform label.

G. Code Response

- Code responders will don full PPE.
- An SOM/Manager will assess risk level before initiating physical contact with an isolated inmate/YP during a code response.
- After the code clears, the area should be disinfected using one of the methods described above. Disposable gear should be placed into the garbage and placed into an exterior garbage bin.

23(1)(a)

H. Hospital and Community Escorts

- An SOM/Manager will conduct a site assessment of the destination in consultation with medical personnel (if possible) to direct necessary precautions.

I. Supervising Medical Procedures

- N95 masks should be worn only when performing specific medical (aerosol generating) procedures, which includes dental services. Officers who are supervising inmates during these procedures, should wear an N95 (if available) or surgical mask. The N95 mask can be donned regardless of fit testing.

J. CPAP (Sleep Apnea) Machine Management

- Inmates/YPs in isolation will not be allowed to use their CPAP machines unless deemed essential by their primary physician.

23(1)(a)

Pandemic Operations – August 27

I. General

- For more information about COVID-19, visit the [Manitoba COVID-19](#) website.
- For health advice or guidance about whether you should self-isolate, staff should consult Health Links (204-788-8200, or 1-888-315-9257), the [Manitoba COVID-19](#) website, or a health professional.
- Ensure that hygiene and cough/sneezing etiquette information is posted in all areas. Hygiene supplies should be available to the inmate/YP population, based on current supply levels.
- Practice good prevention:
 - wash your hands often with soap and water or alcohol-based hand sanitizer
 - sneeze and cough into your sleeve
 - avoid touching your eyes, nose or mouth
 - avoid contact with people who are sick
 - keep your own workstation clean
 - practice social distancing
 - **stay at home if you are sick**

II. Social Distancing

- Centres will reduce movement and direct contact as much as possible while maintaining essential services. This applies to inmates/residents and staff.
- Stage or reduce movement through dining halls, corridors, and other common spaces.
- Implement rotating break schedules in larger units to limit the number of inmates/residents sharing common space.
- Maintain distancing during direct supervision and searching (see below).
- Reduce dormitory counts as much as possible.

III. Cleaning and Supplies

- Supply chains are disrupted and all custody centres have rationing plans.
- Regular cleaning with detergents is an effective tool for preventing the spread of the virus and all centres have implemented aggressive cleaning schedules. Disinfecting fogging equipment was supplied to all centres and is effective in treating large and high traffic areas, but they can also be integrated into regular

cleaning schedules.

- Regular bleach can be diluted in water (1:10) and used as a disinfectant.
- Centres can hire additional cleaning trustees as needed. Pay for cleaners may be increased or can begin at the middle increment.
- Clean escort vehicle PTCUs after each escort and the officer cab (seating area) at the end of every shift:
 - Sweep out the interior and remove garbage.
 - Spray all surfaces within the PTCU with a disinfectant spray (one part bleach to 10 parts water is recommended).
 - Target the steering wheel, handles, seat belt clasp, and any surface that is often touched.
 - Let the spray sit for ten minutes then wipe down.

IV. Programs, Services, Training

A. Staff Training

- Central training and all staff training events are suspended, including emergency response teams.
- Effective September 1/20, staff training will resume for groups of 20 or less (including instructors). Please reference the Covid-19 Training Precautions.

B. Inmate/YP Programs

- Volunteer access to custody centres is suspended.
- Individual (one on one) case management, teacher, counseling, Elder, and chaplain meetings can continue if social distancing can be maintained (6ft apart).
- Effective September 1/20, staff led spiritual care services (e.g. sharing circles, worship services, etc.) and inmate programs are permitted for groups of 10 or less (including leaders) if social distancing can be maintained. Sessions are restricted to occupants of the same living unit. Please reference the COVID-19 Training Precautions.

C. Recreation

- Access to recreation is suspended, unless exercise equipment is installed in dormitory settings.
- Exercise is restricted to 'fresh air' access, but the number of inmates/YPs may be limited to ensure distancing.

D. Personal Visiting

- All personal visits for inmates/YPs are suspended. However, personal visits may be approved by the Superintendent or Deputy Superintendent in exceptional circumstances, e.g. death in the family or other crisis. If granted, visits will comply with screening, separation, and PPE guidelines.
- Non-contact visiting is tentatively scheduled to resume in October 2020.

E. Professional Access/Services

- Contractors and maintenance personnel can access custody centres to deliver essential services or to finish capital projects.
- The use of video and phone technology should be encouraged in place of in-person visits with inmates/YPs.
- In-person visits with inmates/YPs is permitted, subject to screening and PPE requirements. Visits should occur in a non-contact setting (glass) or where social distancing can be maintained, unless physical contact is *required*. In-person visits are permitted for the following:
 - Legal counsel
 - Justice personnel, including probations, parole, etc.
 - Law enforcement
 - Medical, psychiatric, and psychological services (dental services pending)

F. Community Escorts

- Funeral escorts are suspended.
- Non-emergency dental/optometry appointments in the community may be scheduled.
- Before completing medical escorts, an SOM/Manager will conduct a site assessment of the destination in consultation with medical personnel (if possible) to direct necessary precautions. Some health care facilities may have designated entry points and screening for patients.

G. Leisure/Food Services

- Centres will purchase leisure products for isolated and other units due to restrictive conditions. This includes games, magazines, movies, art supplies, etc. Several handheld electronic gaming devices were purchased and distributed.
- When possible, food services will be enhanced with larger portions. Canteen

limits may also be expanded at the Superintendent's discretion.

H. Phone Services

- Three additional free personal calls are being provided to all sentenced adult inmates until August 30/20.
- Bulk call purchases are also available, allowing users to purchase large volumes of personal calling at reduced rates. Public access to kiosks will be maintained.

I. Haircuts

- Effective June 20/20, custody centres may allow haircutting services for non-isolated inmates/young persons, based on the following guidelines:
 - Inmates/YPs must wash their hair and sanitize their hands before having their haircut.
 - Inmates/YPs must remain masked during this process.
 - The person who is cutting hair must wear a gown and gloves. Gloves should be changed between each haircut.
 - Any equipment and all contact surfaces must be sanitized between each haircut.

V. Leave Management

- Effective September 1/20, time limits for the use of leave banks are reinstated and requirements for sick notes will return to normal.
- For PT staff who are required to self-isolate, timekeepers/schedulers should remove all shifts in the affected pay period and mark the staff off 'sick' for the full pay period. This allows the staff to receive pro-rated sick leave based on the average hours worked during the previous 8 week period.
- Corrections staff are declared essential workers. Those who need childcare can contact 204-945-0776, 1-888-213-4754, or email cdcinfo@gov.mb.ca.
- Sick leave used in association with the Coronavirus outbreak will not be considered in relation to the attendance management process. It is the employee's responsibility to ensure that this Coronavirus information is relayed to the employer so that the time can be administered appropriately.
- If you are in a position where you need to be off work sick but don't have sufficient sick leave to cover the absence, please advise your Manager and/or the Deputy Superintendent. We will work with staff to use other leave banks.

VI. Testing

- Testing will be offered to all new admissions to the WRC starting the week of June 1/20. Participation in the testing process or pending results will not impede the transfer process.
- Public health officials have expanded testing criteria to include all symptomatic Manitobans. Symptoms include fever, cough, runny nose and sore throat. Testing capacity has increased and the province is prepared to test anyone who has symptoms of COVID-19.
- Anyone with a fever, cough, sore throat, headaches, shortness of breath, runny nose, nausea, fatigue or rashes are advised to [use the province's online screening tool](#) before going directly to a testing site in their neighbourhood.

VII. Travel and Self-Isolation

- Correctional Officers and Juvenile Counselors are exempt from having to self-isolate if they travel within Canada. However, those who have symptoms should consult Health Links (204-788-8200, or 1-888-315-9257), the [Manitoba COVID-19](#) website, or a health professional, and follow medical direction regarding testing and isolation periods.
- Persons (including staff) who travel internationally are required to self-isolate for 14 days upon return to Canada. Staff are required to use banked leave for the quarantine period unless symptoms develop, and those without available leave will be unpaid.

VIII. Screening

- Senior managers will send employees home if they report to work with flu symptoms.
- The Shift Operations Manager at each centre will confirm (verbally) with every staff member coming on shift (or shortly after) that they are not exhibiting flu symptoms. This check will be documented.
- Infrared thermometers can be used by anyone in accordance with the manufacturer's instructions for identifying cases requiring medical assessment and/or for screening access to the centre.

Screening Procedure:

Before leaving home, staff should self-assess based on the following:

Do you have...

- Fever/Chills (higher than 38 degrees Celsius)
- New or increasing cough
- Shortness of breath or trouble breathing
- Sore throat or muscles
- Headache

In the last 14 days, have you:

- Returned from travel outside of MB, except western provinces, the territories, and northwestern Ontario (West of Terrace Bay)? Note CO/JC exemption above.
- Travelled internationally in the past 14 days? If so, 14 days of self-isolation is required before returning to the centre.
- Had close contact with a confirmed case of COVID-19 while not wearing PPE or practicing social distancing?
- Had a laboratory exposure to COVID-19?
- Had close contact with someone who has flu symptoms?

If you have any of the above symptoms or answered ‘yes’ to any question, stay home and contact Health Links.

Screening upon arrival:

- Centres will designate a staging area.
- Arrival times may be staged to ensure that staff arriving to work should remain 6ft apart prior to screening.
- In colder weather, you may need to wait until your skin temperature normalizes.
- Avoid drinking hot or cold liquids or smoking 15 minutes before screening.
- You will be checked for fever using infrared thermometer.
- You will be asked to confirm your pre-shift self-screening results.

If you have a fever or other symptoms, you will be asked to apply a surgical mask and return home to contact Health Links (204-788-8200, or 1-888-315-9257).

IX. Health Information

- If there is a COVID-19 laboratory diagnosis in your workplace, a public health investigation is automatically triggered. Public Health notifies close contacts of

laboratory-confirmed positive COVID-19 cases and anyone at risk of contracting the virus will be notified by Public Health.

- PHIA continues to apply even if an inmate tests positive. Any inmate who is symptomatic should be considered and treated as suspected positive. There would be no change to approach or PPE on the officer's behalf whether someone was suspected or confirmed positive. The contact protocols noted above still apply.
- Otherwise, each employees' personal health information is theirs to manage and employees are not required to provide the employer with a health diagnosis and the employer has a responsibility to safeguard personal health information. Personal health information will not be shared with other employees.

X. Searches

- If possible, fog areas to be searched before searching begins. Officers should remain 1-2 meters apart while searching open areas and only one officer at a time should be searching in cells.
- Effective June 11/20, K9 services may resume.

XI. Court Appearances, Police Removals, and Medical Escorts

- Inmates/YPs returning from medical escorts with corrections staff do not generally require isolated, but should be assessed based on the following:
 - Length of the escort or time in a public setting, e.g. 12 hours or more would support isolation
 - Exposure to multiple spaces or persons in the community
 - PPE compliance during the escort
 - Supervision during the escort
- Inmates/YPs removed from custody by police agencies will be returned to their home centres and isolated for 14 days.
- Inmates/YPs returning to the custody centre from any external escort should wash/sanitize their hands before returning to their home unit.
- Inmates/YPs attending court outside the custody centre will be returned to their home centre and isolated for 14 days, with the following exceptions:
 - Inmates/YPs attending court in Winnipeg, The Pas, Thompson, Brandon, or Portage.

XII. Release Planning

- Several northern communities are now self-isolating and restricting access.

Release planning at each custody centre must ensure that released persons are able to return to their home communities or find alternatives. Corrections will continue to arrange transport in these cases.

- Probation Officers and Cam Zacharias (RRI) are available for consultation and referrals to assist with the release process.
- If these measures fail, the department will consider long term community placements, e.g. hotels.

XIII. Population Management and Isolation

A. Unescorted Temporary Absences

- All intermittent sentences are suspended and UTAs are authorized in all cases.
- UTAs are authorized for sentenced adult male offenders with 14 days or less remaining before their scheduled ERD and adult females with 20 days remaining. 23(1)(a)
- The release of OC youth are permitted, subject to stable residence.

B. Admission Restrictions

- All new admissions (adult/youth, male/female) in the province are being processed through the Winnipeg Remand Centre (WRC), followed by isolation.
- Admission to the WRC will require a remand warrant, disposition, committal, or other court ordered detention document(s).
- Male federal parole violators will not be admitted to the WRC. Female PVs will continue to be admitted to the WRC.
- CBSA is reviewing all detainee admission and will ensure that only essential cases will be admitted to the WRC.

C. Isolation & Transfers

- All adult admissions will be initially isolated at the WRC. Transfers from the WRC will be administered as follows:
 - Youth admissions will be immediately transferred to the MYC for 14 days of isolation, after the WRC admitting process is complete.
 - Asymptomatic adult inmates will be transferred to designated isolation overflow centres (HCC-male, WCC-female) after 10 days of isolation (or as required) to complete their time in isolation.
 - Symptomatic adult inmates will remain in isolation at the WRC until

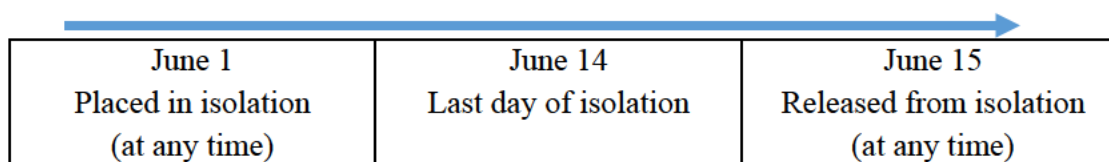

cleared, followed by transfer to other custody centres.

- Inmates/YPs must be symptom free for a minimum of 48 hours before their scheduled release from isolation.
- Adult male centres (MRCC, BCC, TPCC) will select transfers from the HCC and WRC as inmates clear isolation. Transfers will consider place of residence, court appearance location, and security needs.
- Inmates/YPs who become symptomatic in any custody centre will remain in that centre and be isolated for 14 days from the onset of symptoms, as assessed by medical personnel.
- Medical personnel will assess all inmates/YPs prior to transfer. However, an inmate/YP who is placed in asymptomatic isolation, and remains asymptomatic, does not require a medical assessment before release from isolation.

D. Isolation Conditions

- Isolated inmates/YPs will receive a minimum of 30 minutes out of their cell per day.
- Whenever possible, one inmate/YP per cell will apply in all isolation areas. However, if counts increase, two inmates/YPs who are admitted to isolation units on the same day can be housed in the same cell, assuming compatibility. As much as possible, isolation will also separate males/females and adults/youth by unit.
- If two inmates/YPs occupy an isolation cell and one becomes symptomatic, they will be separated and the asymptomatic inmate/YP would be isolated for another 14 days.
- Isolation may be extended if the inmate/YP becomes symptomatic while in isolation, as directed by medical personnel.

Calculating time in isolation (sample):

E. Police/Sheriff Transports for Admission

- Rural custody centres who normally provide intake services (BCC, TPCC) will assist arresting agencies and Sheriffs as much as possible by deploying escort officers and vehicles to transport prisoners to the WRC. Staff have been designated at each of these centres to coordinate these transports.

XIV. Prevention and PPE Use

* Developed in consultation with Dr. Jasdeep Atwal and Director of Health Services, Bev Reeves

A. How the Virus Spreads

- Based on the information we have to date, the spread of the COVID-19 is by droplet spread only and is not airborne (does not stay in the air, ducts, vents, etc.).
- With droplet spread the virus *cannot* penetrate skin but can only infect someone if the virus enters through a mucous membrane (eyes, nose, and mouth). This can occur directly if the droplet enters one of these locations or indirectly (if your hand touches droplets then that same hand is used to touch your mouth, nose or eyes).
- Spread is reduced or eliminated by regular hygiene, cleaning, and proper application of PPE as required.

B. Principles

- Practice regular hand hygiene and coughing etiquette, cleaning, and social distancing.
- Practice hand hygiene before/after donning/doffing PPE.
- Minimize movement of staff and inmates between symptomatic, asymptomatic and non-isolation spaces.
- Once PPE is donned, avoid doffing. PPE may be doffed and changed when taking a meal/coffee break, or if wet, damaged, or soiled, but staff are advised to avoid changing PPE unnecessarily.
- Once PPE is doffed, this should be replaced by clean or new PPE, whenever possible.
- Regarding reusable masks, MB health has advised that “wearing a non-medical mask is another way of covering your mouth and nose to prevent your respiratory droplets from spreading to others or landing on surfaces. A mask can reduce the chance that others are coming into contact with your respiratory droplets”.
- Medical personnel may vary the use of PPE for specific procedures and based on a risk assessment.

C. PPE Requirements

INMATES/YPs			
Location	Reusable Masks	Surgical Masks	Surgical Mask Vinyl/nitrile/latex Gloves Coverall
Outside Cell, Asymptomatic	√		
Outside Cell, Symptomatic		√	
Community Escort* (from isolation)			√
Community Escort (from non-isolation)	√		

* Does not apply to transfers between centres by Corrections escorts. For transfers, use 'outside cell' precautions as noted above.

STAFF				
Location/Area	Reusable Masks	Eye Protection glasses/eye wear	Vinyl, Search, or Plastic Gloves*	Full PPE vinyl/nitrile/latex gloves face shield surgical mask gown/coverall
Custody Centres (all staff)	√			
Asymptomatic Isolation Units/Centres	√	√	Optional	
Symptomatic Isolation				√
Intake Area (isolation centre only)				√
Escorts (transporting symptomatic or new admissions)				√

* To be made available based on supply, as determined by the custody centre.

D. Managing PPE

- Search gloves must be cleaned/disinfected after each encounter (within 6ft) with an inmate/YP.
- If reusable gowns/coveralls are used, these should not leave the custody centre and must be laundered on site.

- A minimum of three reusable masks will issued to all staff and should be worn for the duration of the shift, covering nose and mouth (note exception for breaks above). These should be retained by staff and hand washed after each shift, using warm-hot water and regular detergent, rinsed, and hung to dry to prolong life.
- Eye protection and/or face shield will be issued to staff as needed. These should be retained and cleaned/disinfected with a mild detergent before and after shift, or if doffed for any reason.
- Inmate/YP reusable masks should be retained by the inmates/YPs for further use but will be laundered/replaced daily, or when damaged, wet, or visibly soiled.

E. Managing Isolation

- Inmates/YPs are not required to wear PPE if they are contained in a cell or they are in a cell with an open door/meal slot and are not within 6 ft. of others.
- If an inmate/YP refuses to comply with PPE requirements, they are not to be moved and the SOM/Manager is to be advised of non-compliance.
- Breaks in all isolated areas. Staff will attend the cell with sanitizer, conduct a wellness check (e.g. how are you feeling, are you having any symptoms, feeling better/worse etc.), ensure the inmate/YP dons a mask, and sanitize the inmates/YPs hands. Upon conclusion of the break or unit access, hands will be sanitized again before returning to the cell.
- Cleaning of contact surfaces in symptomatic areas is required between breaks.

F. Uniform Management

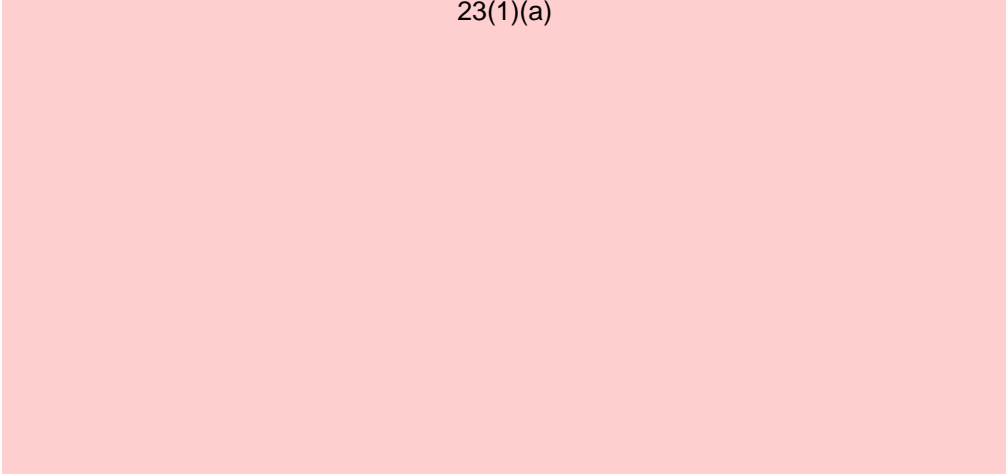

- Keep uniform items separate from regular clothing at home, including footwear.
- Staff should be changing in and out of their uniform at work.
- Clean uniforms should come to work and should be washed after each shift, using regular detergent and warmest machine temperatures recommended on the uniform label.

G. Code Response

- Code responders will don full PPE.
- An SOM/Manager will assess risk level before initiating physical contact with an isolated inmate/YP during a code response.
- After the code clears, the area should be disinfected using one of the methods described above. Disposable gear should be placed into the garbage and placed into an exterior garbage bin.

- If administering CPR (all inmates/YPs):
 - Only essential staff should be attending to the patient and don an N95 mask. This includes those directly involved in resuscitation efforts or to maintain security.
 - A surgical mask should be placed on the patient unless medical is supplying oxygen.
 - ‘Hands-only’ procedures apply. AED and compressions will be used, but no breaths administered.
 - Follow AED voice prompts continue CPR until EMS arrives.

23(1)(a)

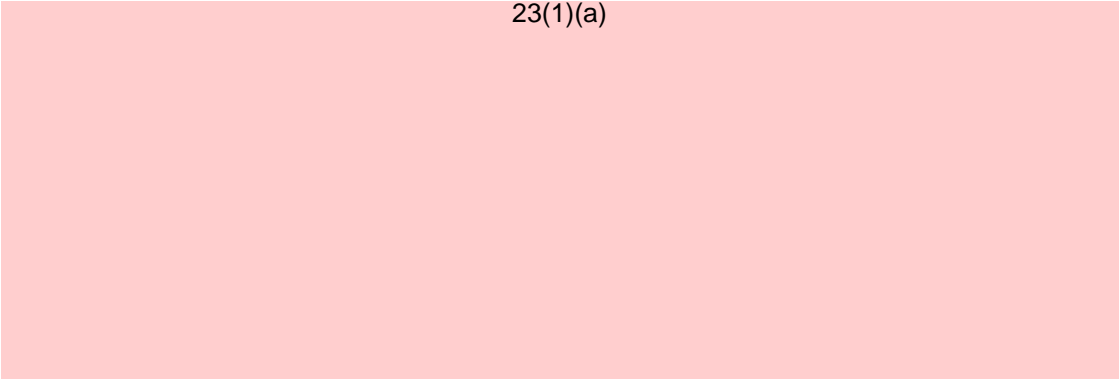

H. Supervising Medical Procedures

- N95 masks should be worn only when performing specific medical (aerosol generating) procedures, which includes dental services. Officers who are supervising inmates during these procedures, should wear an N95 (if available) or surgical mask. The N95 mask can be donned regardless of fit testing.

I. CPAP (Sleep Apnea) Machine Management

- Inmates/YPs in isolation will not be allowed to use their CPAP machines unless deemed essential by their primary physician.

23(1)(a)

23(1)(a)

COVID-19 Custody Release Planning (CRP) Protocol

272 of 272

CRP – ALL

- All inmates receive a Custody Release Plan (CRP), with a residence identified. All CRPs are completed in consultation with Probation/RRI (where applicable).
- All inmates have access to the *Health Links COVID-19 Fact Sheet* and have the numbers to call.
- All inmates are reminded of proper social distancing and told to call Shared Health if their conditions change.
- **Planning in advance is critical.** Shelters have limited space and have Intake processes—*phone in advance!*

COVID EFFECTED

- Inmates who are COVID-19 Positive or Presumptive are being followed up by Public Health (PH).
- Inmates who are symptomatic, have been in contact with someone COVID+, or are waiting for their first test-result are not being followed by Public Health.
- Contact the Medical Unit to determine if the inmate is being followed by Public Health (PH).

WHO TO CALL

- If the inmate being released **IS** followed by PH and part of the *Alternative Isolation Program*—phone **(204) 795-3093** between between 08:30 -16:30 hrs (7 days/week), to arrange transportation to the program.
- If the inmate being released **IS NOT** followed by PH and needs shelter, phone the *Emergency Shelter Isolation Intake Unit* - **204-306-7857** between 09:00 - 17:00 hrs (7 days/week) to arrange intake.

SHELTER

- If the inmate is being followed by PH and the location to be released is the *Alternative Isolation (Hotel Program)*, phone **(204) 795-3093** to inform them and confirm in advance. Consult with the Medical Unit, as they are in touch with PH. Public Health will arrange transportation during business hours for those enrolled in the program.
- If the inmate is being followed by PH and the location to be released is an Emergency Shelter, phone **204-306-7857** to advise the *Alternative Isolation Shelter Program* of the release, transport to 777 Sergeant Ave (business hours only). After hours - transport Inmate to 75 Martha Avenue.

TRANSPORTATION

- Custody will transport inmates who are COVID Positive/Presumptive, who have no means of getting to their self isolation residence within Winnipeg.
- If the location to be released is a private residence identified in the CRP and there is nobody who can provide safe transportation – we will transport them.
- If the inmate is released *after hours* and is being tracked by Public Health, and has no place to self isolate—transfer/escort the inmate to the Main Street Project (75 Martha Ave). If space is available they may be directed to 190 Disraeli until the next day.
- If no space is available at the shelter they may direct the individual to the hospital.
- Follow the PPE Guidelines for transporting inmates - outlined in the *Pandemic Operations Document – April 22nd*
