

Are you symptomatic in the 48 hours after your COVID-19 vaccination?

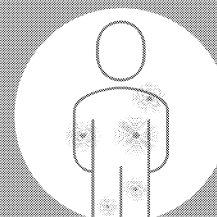

In the 48 hours after your COVID-19 vaccination you may experience the following symptoms:

Headache

Fatigue

Muscle or
body aches

If the symptom(s) are **mild** (you feel well enough to work) and began **after** your vaccination, you can come to work.

If the symptom(s) persists past 48 hours after vaccination, remain home and contact your manager and the local public health authority.

If you have any questions or concerns, please contact your manager.
