**Subject:** RE: Archambault

Hi Chris,

Apologies for the delay, we have taken these last days to consult across the CRC including with our OHS team, senior leadership, QC operations, QC technical health lead and our Legal and Risk team.

If you have questions about the team's recommendations once they are submitted, please do reach out to us. We would just underscore that these are *recommendations*, and the decision to implement remains with CSC.

As we are a neutral, independent and impartial organisation, it is incumbent upon us to first complete the recommendations process. Should you have any questions, we will certainly be available to discuss them. Trust that the language will reflect the provenance of the recommendations, and the nuances of the situation.

Very Sincerely,

[REDACTED]

[REDACTED]

CSC Technical Lead - Senior Health Officer, Health in Emergencie  
SCC Responsable Technique - Agente Principale de Santé, Santé en cas d'urgences

**Subject:** Archambault  
**Importance:** High

Hi [REDACTED]

I hope you had a good weekend.

We met this morning and I understand that the site visit report for Archambault has not yet been submitted to CSC, thank you for this.

We are hoping to set up some time today to talk with the team that conducted the site visit to discuss their recommendations before the final report is submitted. We want to ensure that we understand the factors that are influencing your recommendations particularly around the need for N 95's on the site.

Can we arrange a time??

Thanks

CC
