**Subject:** Update on vaccination for ACFO NLMCC

We have received a request from ACFO for an update on the vaccinations. We have taken the following information from a previous update provided by PIPSC but removed the information directly related to health care workers. Can you please advise by Tuesday, March 9<sup>th</sup>, if there is any further information that can be added to the response.

Thank you.

As you know, under the *Corrections and Conditional Release Act*, CSC has an obligation to provide essential health care to federal inmates. We provide health care to approximately 12,500 inmates in correctional institutions across the country. In the first phase, a small number of doses are being made available to inmates who are older and medically vulnerable. Our vaccination strategy follows guidance set by the National Advisory Committee on Immunization (NACI) on who gets the vaccine and when. This is consistent with the approach we followed during other public health situations, such as H1N1.

In a parallel and equally important track, our employees are also top of mind. Many of your members work to keep our operations going 24/7. I value what they do every day and their work is essential.

Provinces and Territories will provide vaccines to our employees, based on the NACI prioritization.
