RE: Benefit/Risk Information for Immune Suppressed Individuals

Receiving _____ COVID-19 Vaccine

The National Advisory Committee on Immunization (NACI) with the Public Health Agency of Canada (PHAC) recommends that a complete COVID-19 vaccine series may be offered to individuals who are immunosuppressed due to disease or treatment in the authorized age group if a risk assessment deems that the benefits outweigh the potential risks for the individual, and if informed consent includes discussion about the absence of evidence on the use of COVID-19 vaccine in this population.

I have read and been fully informed by the health care provider regarding the above information.

I hereby give permission for myself to receive this vaccine.
